## II、Disassembly Tools

- 1、0.8mm Torx screwdriver
- 2、plastic tweezers
- 3、Philips screwdriver
- 4、FPC lever
- 5、Pin
- 6.Metal tweezers (as below picture)

## III、Disassembly Guide

- 1、 **Make sure the phone is switched off:** Press the home button, check the cellphone is on or off. If it is on. Please press the power button to switch off. (Note: do not disassembly the cellphone when the cellphone is on)
- 2、 **SIM Tray Removal:** Insert the Ejection Pin in the phone. Push the pin harder to eject and remove the SIM tray ( as below picture )

Tel /86-756-6116288  
Fax/86-756-6116200

**3、TP Screw Removal \*2:** Use the 0.8mm Torx screwdriver to unfasten 2pcs TP screws from the bottom of phone as below figure ( as below picture )

**4、Battery cover removal :** 1. Place one layer of cushion on table; 2. When knocking battery cover, keep phone to 70-80 degrees with table. Then knock one corner of phone. Knock one corner of battery cover to separate it 1-2mm away from phone. 3. Use disassembly shim to unfasten the back cover ( **Note : Remove the battery cover should take the protect film off, and do not knock too hard to damage the cellphone** )

Fax/86-756-6116200

## V、 Assembly guide

- 1、 **Check the surface of front module assembly, assemble the receiver, Vice-MIC rubber case, front camera rubber case:** get the front module assembly, Check the surface of front module assembly is good. Get the receiver and remove the release paper, then assemble the receiver to corresponding position in the front module assembly, and the receiver shrapnel should face to the front of LCD component to assemble, and then assemble Vice-MIC rubber case and front camera rubber case (as below picture, receiver shrapnel face to up)

- 2、 **Assemble side button FPC :** check not missing component to assemble in last step, and remove the dual faced adhesive tape from side button FPC, and then assemble the side button on the LCD touch screen assembly.

## 珠海市魅族科技有限公司

MEIZU TECHNOLOGY CO., LTD.

广东省珠海市科技创新海岸魅族科技楼

MEIZU Tech Bldg., Technology & Innovation Coast,  
Zhuhai 519085, Guangdong, ChinaTel /86-756-6116288  
Fax/86-756-6116200

- 3、 Assemble front camera, light sensor rubber case, Waterproof labels, front camera Conductive cloth, flash light Mylar don't cover shrapnel (as below picture)

- 4、 Connect LCD-FPC , and fasten 6 screws in mainboard , stick the ESD Mylar. **Be careful not to cover the shrapnel**

- 5、 Assemble the battery and connect the battery FPC

- 6、 Paste Home Button Silicone

@MEIZU

# 珠海市魅族科技有限公司

# M1721 Firmware upgrade guide

(Version: V1.0)

Edited by: Shifeng Wang

Reviewed by: Zhifeng Zhong

Approved by: Chuansan Wang

Confidential Document

Issued date: Aug 23, 2017

Implementation date: Aug 23, 2017

## 一、I. Preparation

### Hardware

1、One PC (recommended configuration: dual-core CPU, 2 GB or more memory, 250 GB or more hard disk drive, and Windows 7 operating system)

2、One data cable (Micro USB data cable)

3、Handset (the power should be 30% more)

### Software (Downloaded from the FTP)

1、FLYME firmware package、Engineering firmware package

2、Flashing tools (Including MultiPortQLoader\_v1.6.1.0 tools)

3、Upgrade driver (Including Qualcomm driver QUD.WIN.1.1 Installer-10025)

4、Running environment:

①Microsoft.NET Framework4: dotNetFx40\_Full\_x86\_x64。

②Microsoft Visual C++ 2008: vcredist\_X86

③Microsoft Visual C++ 2010: vcredist\_X86

④Microsoft Visual C++ 2013: vcredist\_X86

**\*M1721 firmware upgrade note: ( needn' t install the Softdog driver, needn' t run the SFC tools, needn' t connected VPN )**

## II. Handset Drivers Installation

### Install driver

1、Uninstall the old Qualcomm driver and MTK platform's driver. (**Samsung platform driver needn't uninstall**) ,If the PC not install Qualcomm driver and MTK driver before. This step can skip.

Access the control panel → uninstall the program, then uninstall the Qualcomm driver in this page.

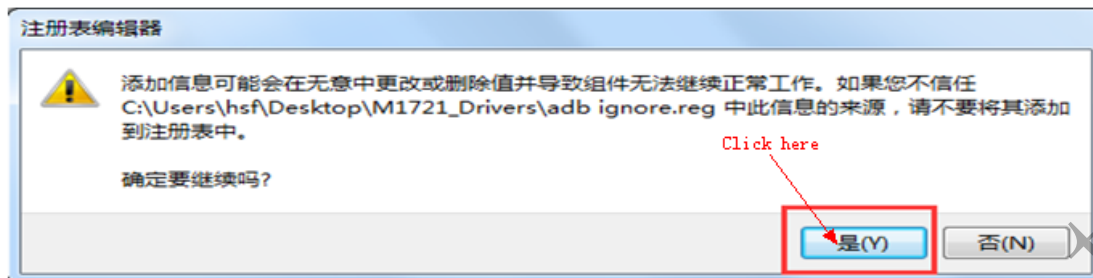

Python 2.7.12	57.1 MB
<b>Qualcomm USB Drivers For Windows</b>	<b>43.5 MB</b>
Realtek High Definition Audio Driver	

platform driver need to uninstall too, and then reboot the PC;

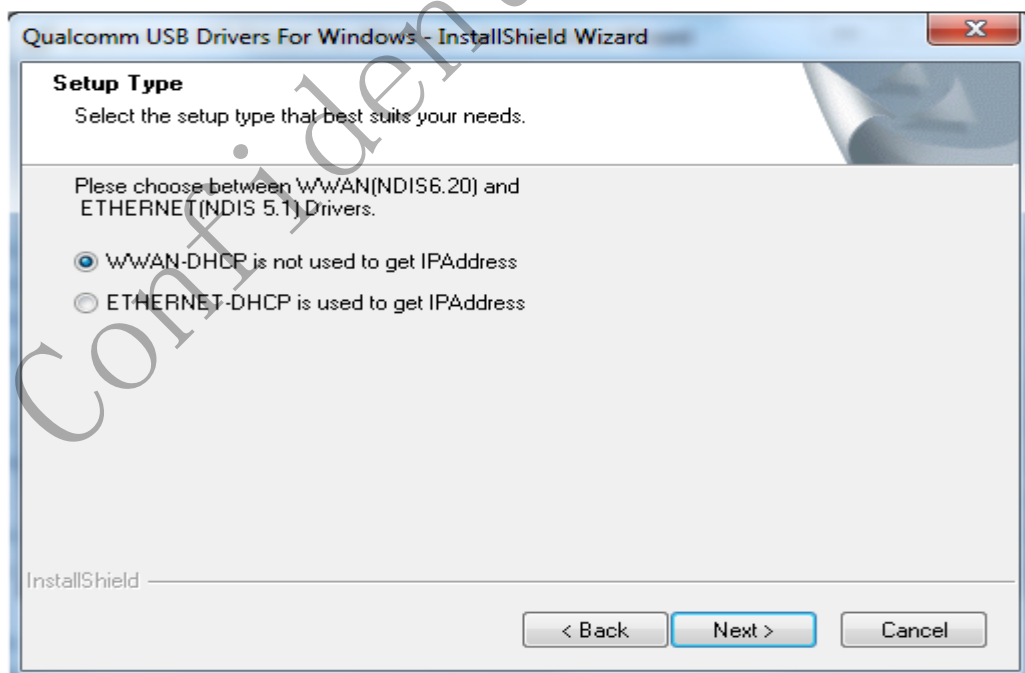

**All the model upgrade, re-burn were can be finish , Driver install should follow this order : Samsung , QUALCOMM, MTK.**

2、Add registry,Access the driver folder ,click “ adb ignore” Add registry,as below picture:

ADB	2017-08-21 16:55	文件夹	
<b>adb ignore.reg</b>	<b>2017-05-24 19:47</b>	<b>注册表项</b>	<b>1 KB</b>
dotNetFx40_Full_x86_x64.exe	2012-03-27 0:00	应用程序	49,268 KB
Qualcomm USB Drivers.exe	2014-05-23 18:03	应用程序	13,353 KB
vcredist2008.exe	2010-11-01 17:35	应用程序	4,031 KB

3、Install the QUALCOMM driver, double click driver installer as below picture “QUD.WIN.1.1 Installer-10025” ;Choose default install is ok.

珠海市魅族科技有限公司

MEIZU TECHNOLOGY CO., LTD.

广东省珠海市科技创新海岸魅族科技楼

MEIZU Tech Bldg., Technology & Innovation Coast,  
Zhuhai 519085, Guangdong, China

Tel /86-756-6116288  
Fax/86-756-6116200

click "Finish" button to finish the installation

#### Install running environment

- 1、Install vcredist\_x64 driver (if you had installed this driver before, please skip this step)  
Run vcredist\_x64, the interface show up, then click "install", until the program auto install to finish.

## 珠海市魅族科技有限公司

MEIZU TECHNOLOGY CO., LTD.

广东省珠海市科技创新海岸魅族科技楼  
MEIZU Tech Bldg., Technology & Innovation Coast,  
Zhuhai 519085, Guangdong, ChinaTel /86-756-6116288  
Fax/86-756-6116200

Microsoft Visual C++ 2008 and Microsoft Visual C++ 2013 install methods same with 2010.

2、Install dotNetFx40\_Full\_x86\_x64 driver (if you had installed this driver before, please skip this step)

Run dotNetFx40\_Full\_x86\_x64, click "Install" when the below windows show up

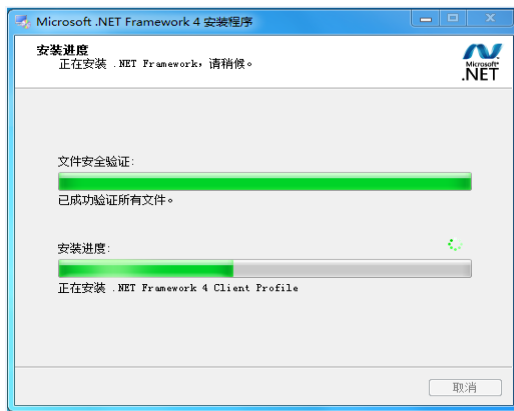

Installing

珠海市魅族科技有限公司

MEIZU TECHNOLOGY CO., LTD.

广东省珠海市科技创新海岸魅族科技楼

MEIZU Tech Bldg., Technology & Innovation Coast,  
Zhuhai 519085, Guangdong, ChinaTel /86-756-6116288  
Fax/86-756-6116200

Remind as below picture when the installation is completed. Click "Finish"

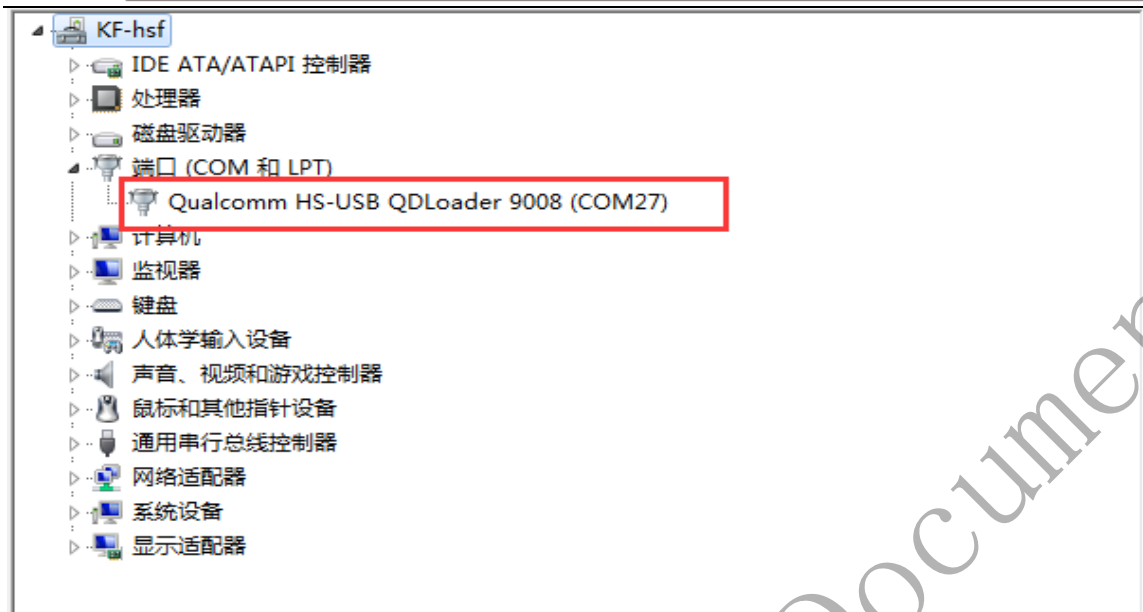

Check the driver is installed successful or not:

Right click the computer icon on the desktop, and then choose "manage", access to device manager. Power off the handset first, and then press the Volume plus button & Volume minus button and insert the USB data cable to connect the phone with the computer. Check the device manager port will show "Qualcomm HS-USB QDLoader 9008 (COM27)" ( Maybe the port number will different , as below picture CPM27 )  
Qualcomm HS-USB QDLoader 9008

珠海市魅族科技有限公司  
MEIZU TECHNOLOGY CO., LTD.

广东省珠海市科技创新海岸魅族科技楼  
MEIZU Tech Bldg., Technology & Innovation Coast,  
Zhuhai 519085, Guangdong, China

Tel /86-756-6116288  
Fax/86-756-6116200

If the yellow exclamation mark show on the port, it mean that the driver has not been installed successfully, you need to update the driver software manually, the methods detail as following:

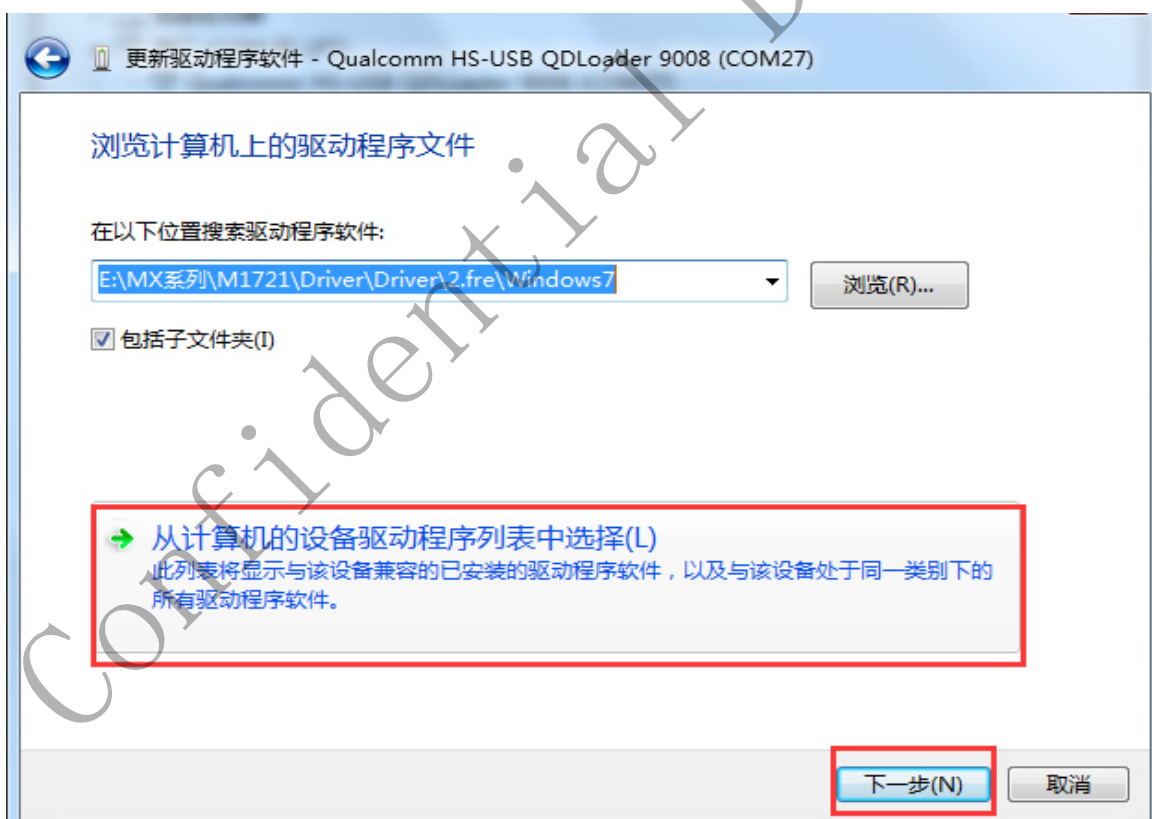

Choose the driver port and right click, then choose “update driver application” as below to install:

珠海市魅族科技有限公司

MEIZU TECHNOLOGY CO., LTD.

广东省珠海市科技创新海岸魅族科技楼  
MEIZU Tech Bldg., Technology & Innovation Coast,  
Zhuhai 519085, Guangdong, ChinaTel /86-756-6116288  
Fax/86-756-6116200

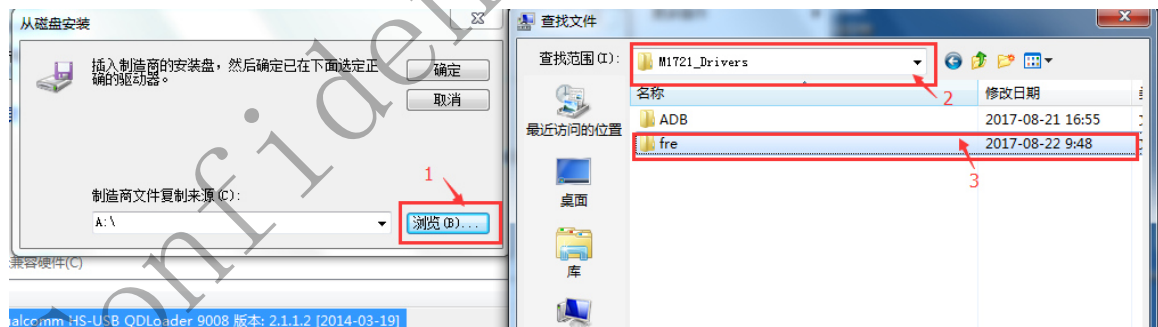

珠海市魅族科技有限公司  
MEIZU TECHNOLOGY CO., LTD.

广东省珠海市科技创新海岸魅族科技楼  
MEIZU Tech Bldg., Technology & Innovation Coast,  
Zhuhai 519085, Guangdong, China

Tel /86-756-6116288  
Fax/86-756-6116200

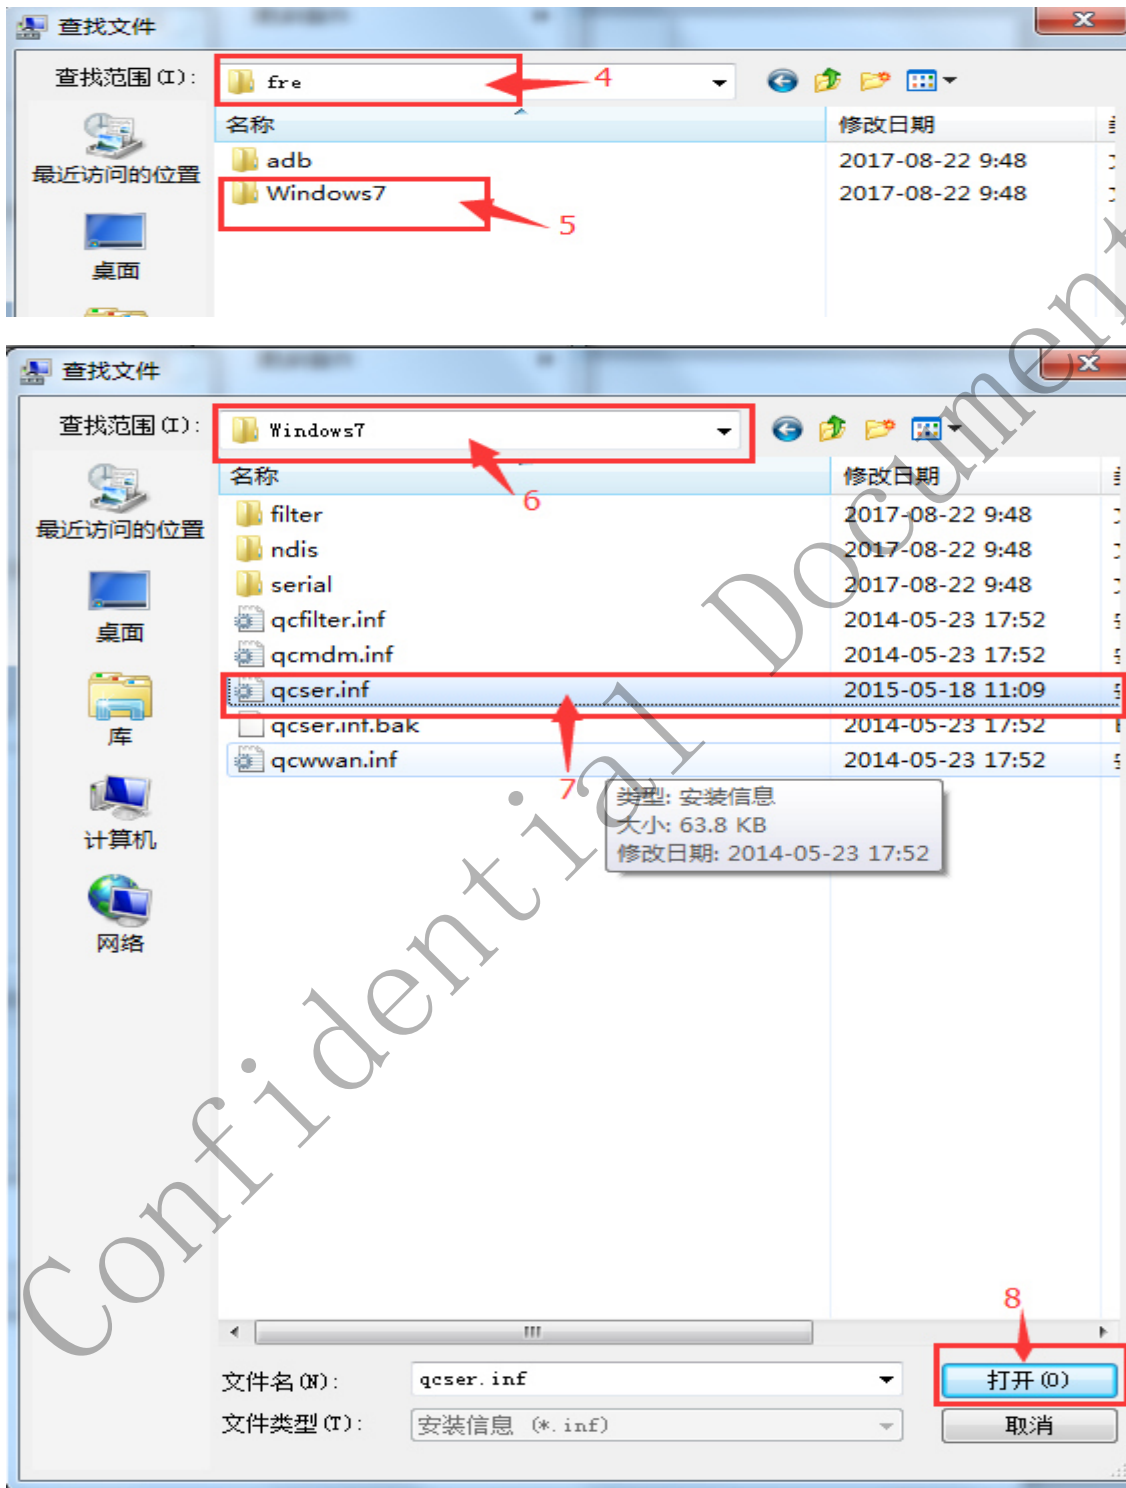

Then follow step 1-9 as below picture.

珠海市魅族科技有限公司  
MEIZU TECHNOLOGY CO., LTD.

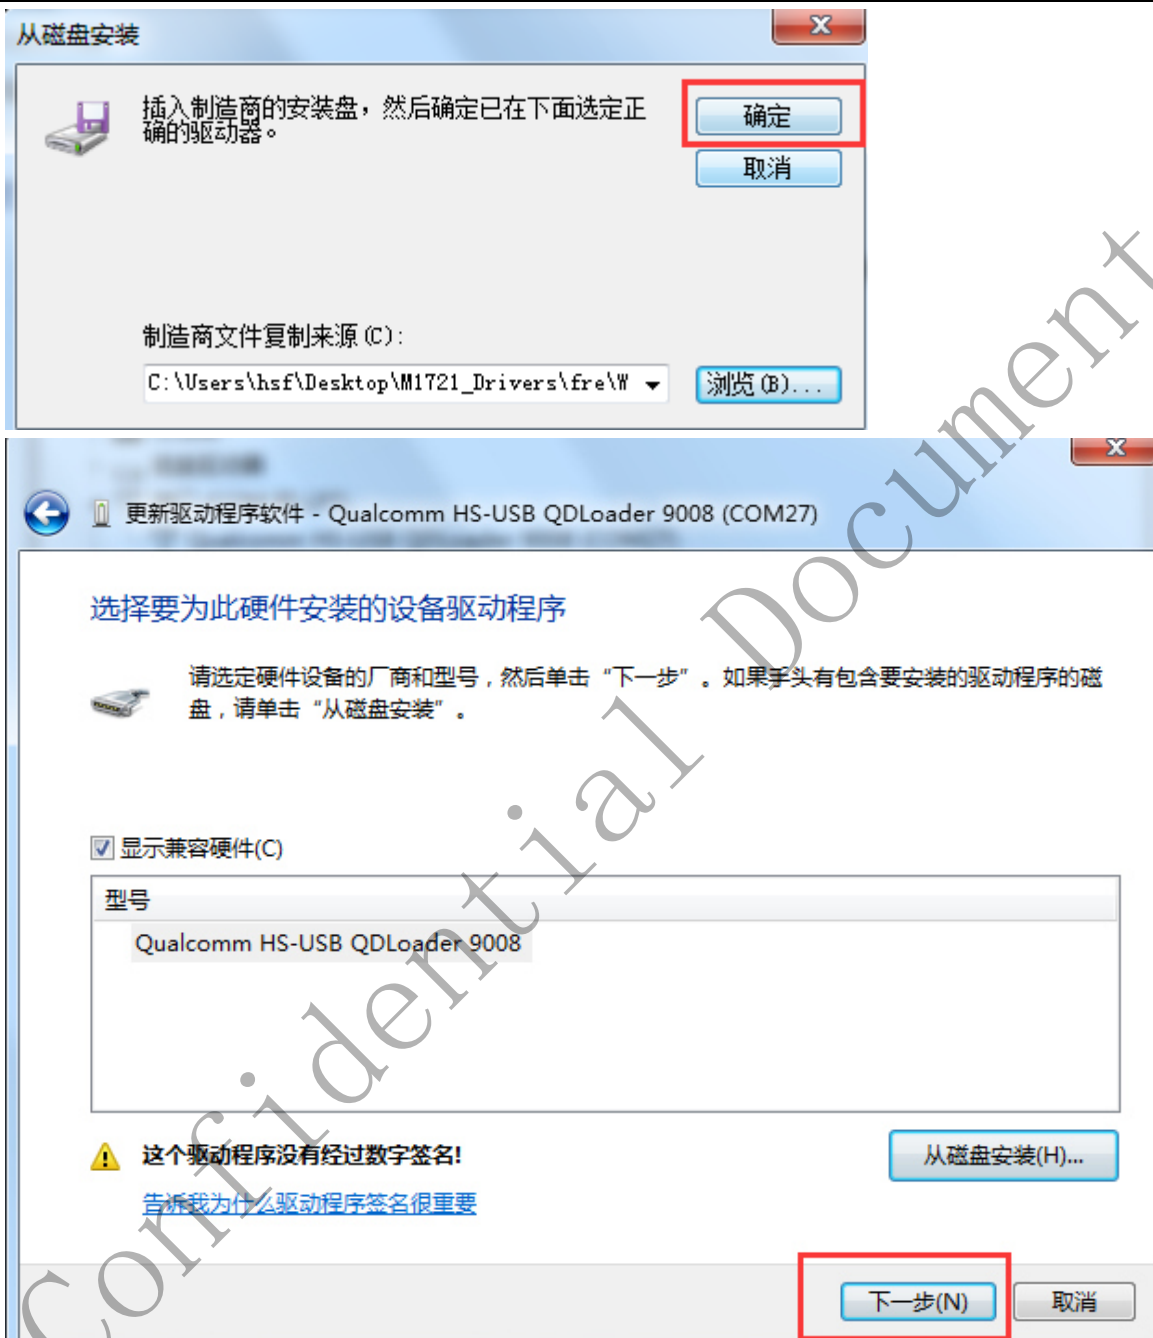

广东省珠海市科技创新海岸魅族科技楼  
MEIZU Tech Bldg., Technology & Innovation Coast,  
Zhuhai 519085, Guangdong, China

Tel /86-756-6116288  
Fax/86-756-6116200

## 珠海市魅族科技有限公司

MEIZU TECHNOLOGY CO., LTD.

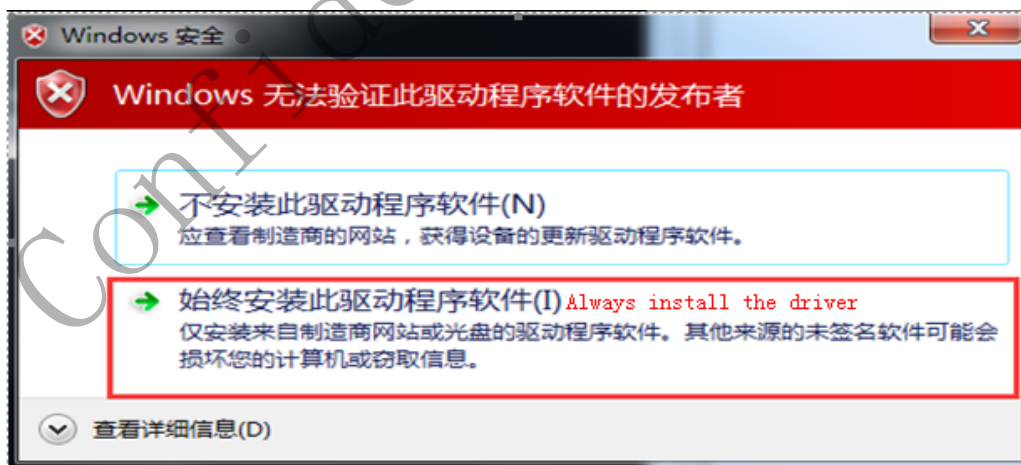

广东省珠海市科技创新海岸魅族科技楼  
MEIZU Tech Bldg., Technology & Innovation Coast,  
Zhuhai 519085, Guangdong, ChinaTel /86-756-6116288  
Fax/86-756-6116200

珠海市魅族科技有限公司

Zhuhai 519085, Guangdong, ChinaTel /86-756-6116288  
Fax/86-756-6116200

The same dialogue window will pop up three to four times. Select “Always install the driver” every time to proceed with the installation. As below picture:

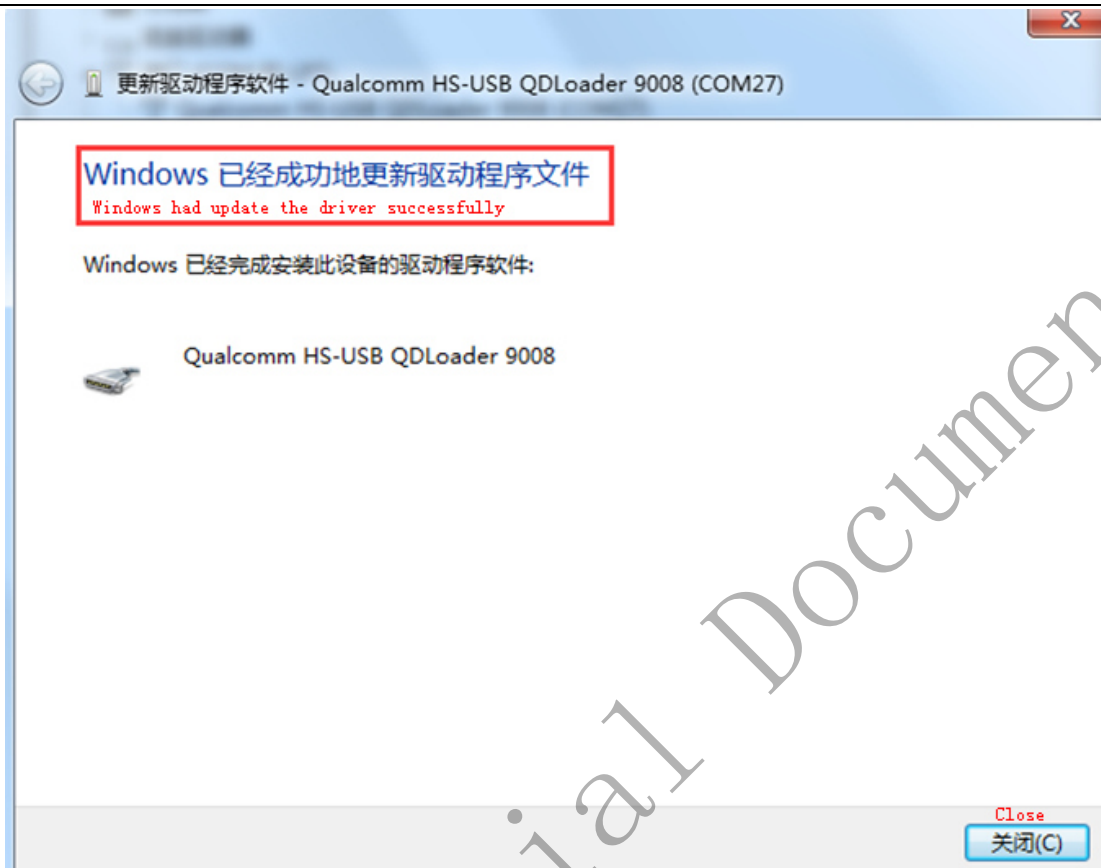

Install successful will show as below picture:

珠海市魅族科技有限公司  
MEIZU TECHNOLOGY CO., LTD.

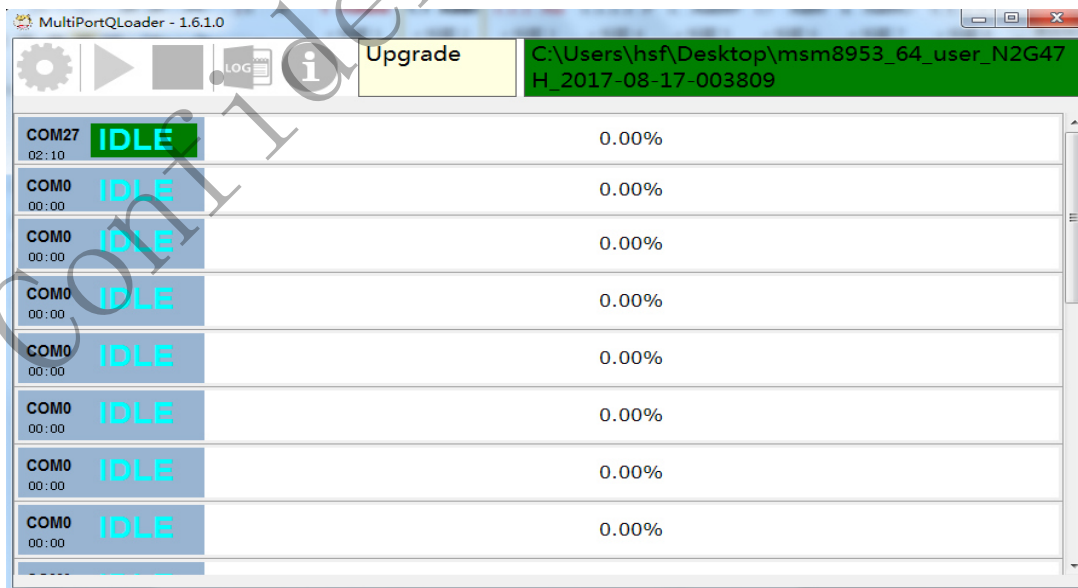

广东省珠海市科技创新海岸魅族科技楼  
MEIZU Tech Bldg., Technology & Innovation Coast,  
Zhuhai 519085, Guangdong, China

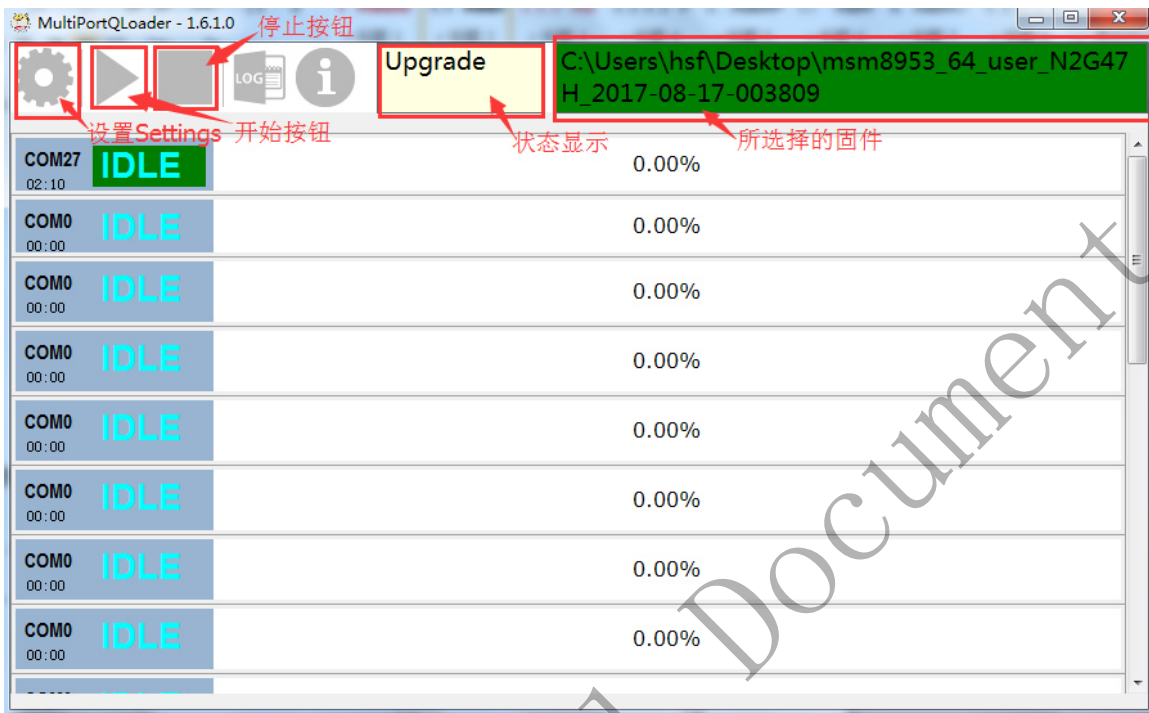

Tel /86-756-6116288  
Fax/86-756-6116200

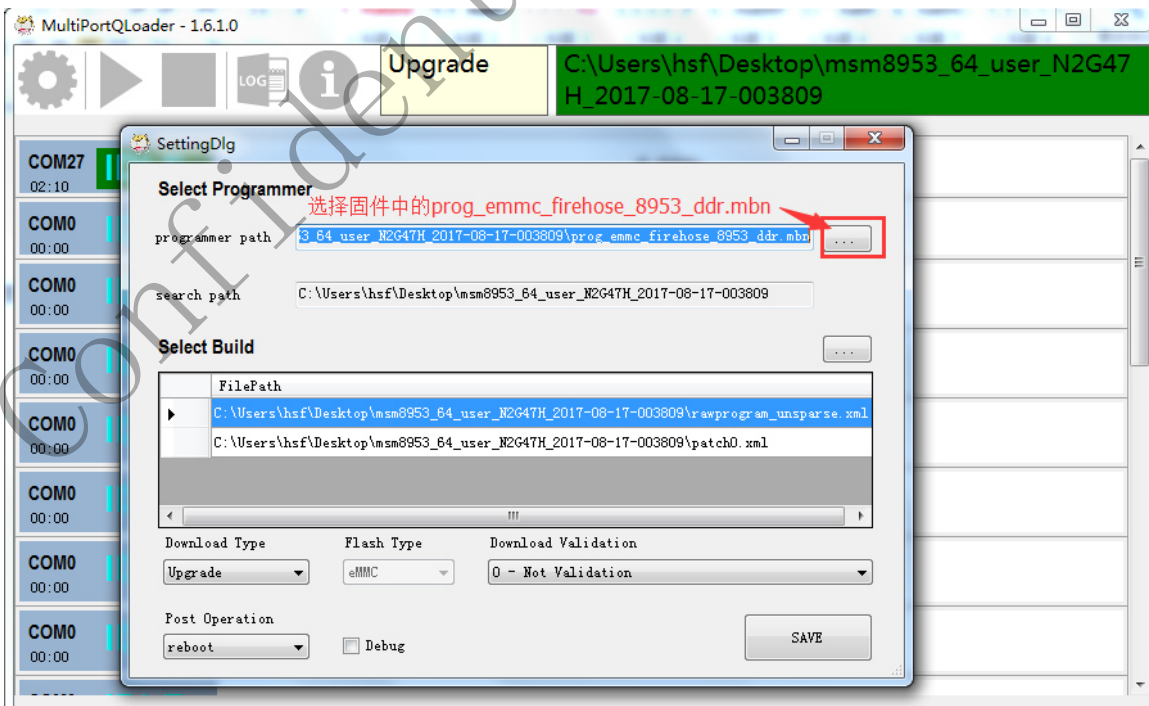

### III Flash the Flyme firmware or Engineer firmware

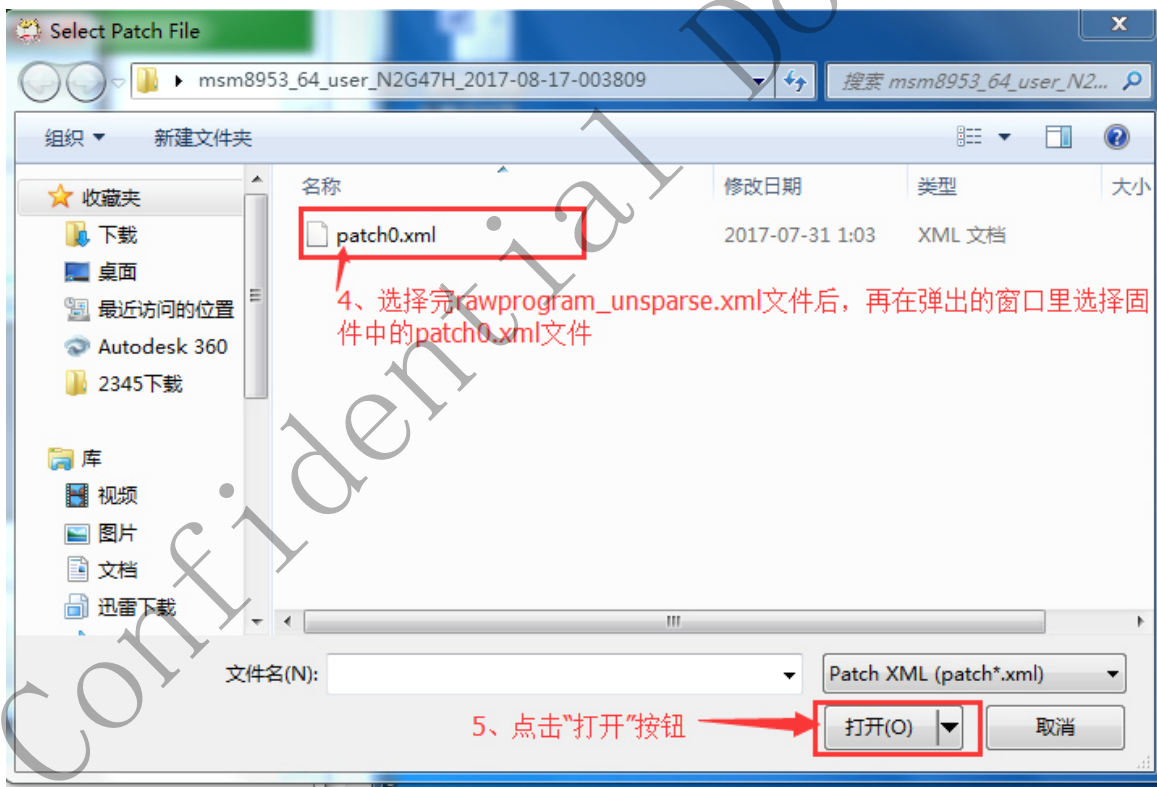

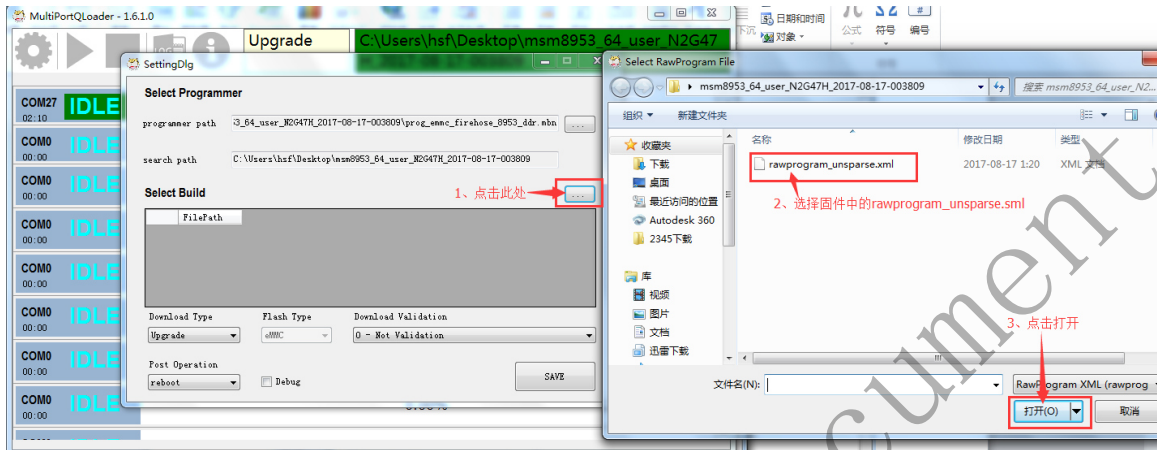

1、Run M1721 firmware upgrade tools "MultiPortQLoader\_v1.6.1.0", double click MultiPortQLoader.exe, as below picture

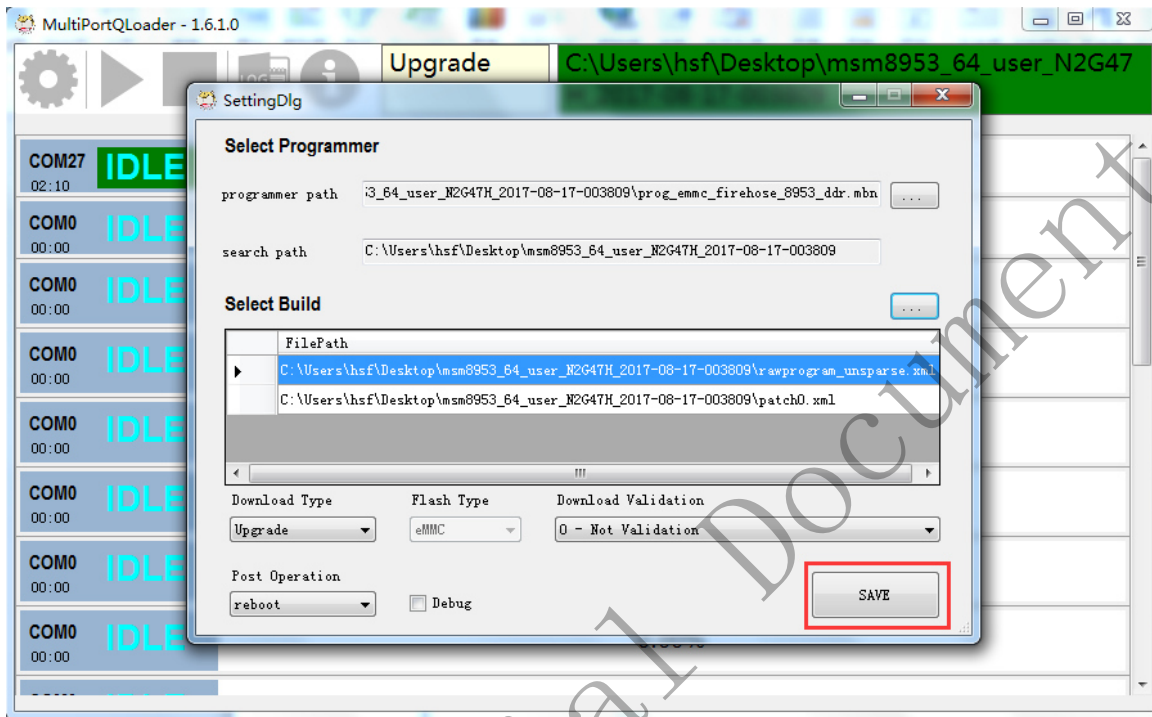

Click “Settings” button,the interface will be show up as below picture, configuration the download information:

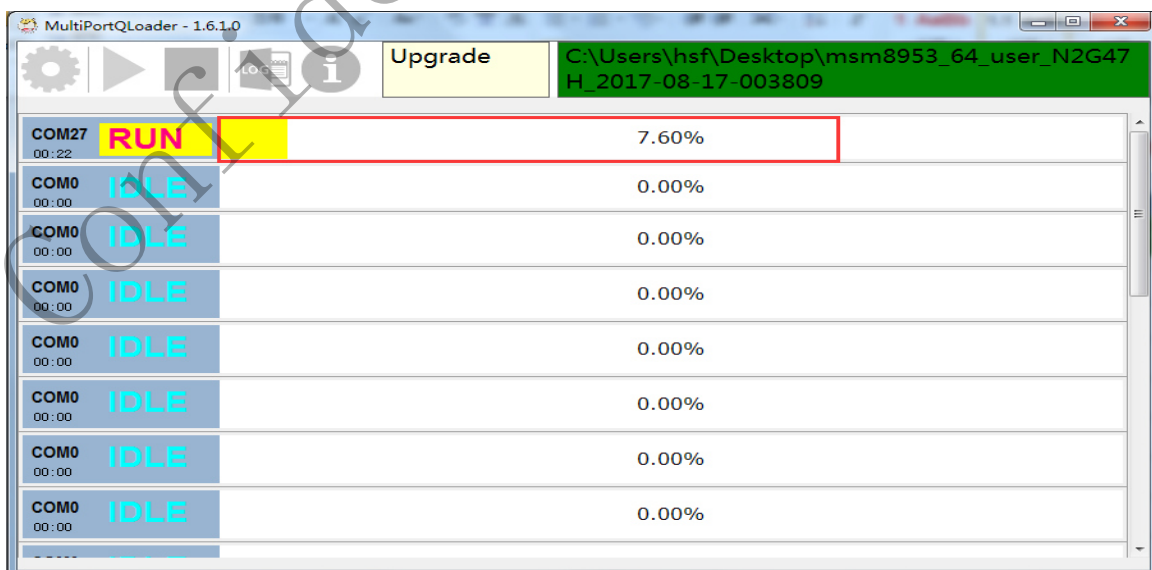

Except where the above specified location needs to be set, the others no need to set it, all the setting is completed. click “SAVE”, as below picture:

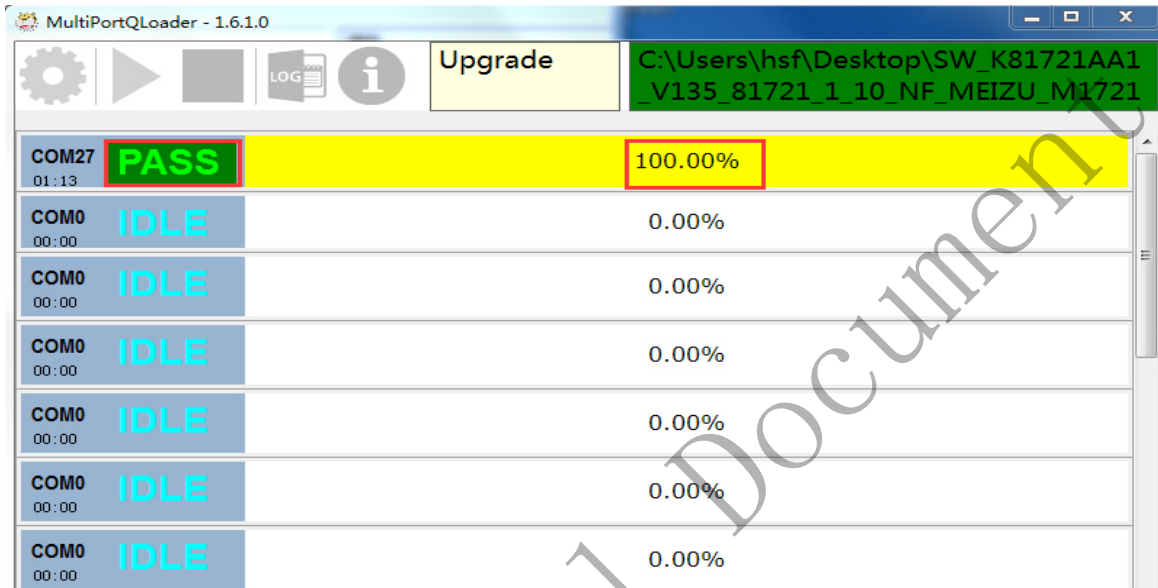

2、click “▶” button (start button) ,run the upgrade tools, When the mobile phone is powered off, press the Volume minus button & volume plus button; We should hold it. and then insert the USB data cable to connect the phone with the computer, the upgrade tools will auto upgrade, release the buttons.as below picture:

The tools process bar show 100% and PASS, it mean that the upgrade is successful. The handset will auto boot after the upgrade is successful.

## Chapter 1 Caution of Maintenance

1. Only authorized technicians can do maintenance and calibration.
2. Make sure that engineers wear antistatic wrist strap repair phones in antistatic station.
3. Make sure that maintenance room is covered with antistatic mat, and the maintenance table is covered with antistatic material.
4. Make sure that all necessary screws and parts are installed in correct location of phone after maintenance and adjustment.
5. After maintenance, clean the PCBA.
6. As static electricity is the main reason for electronics damages, engineers shall repair phones in an anti-static environment and shall take effective antistatic protection measures.
7. For an occurrence of NG test, engineers should check if the test point is dirty or test point contact is poor.
8. Check if water penetrates to mainboard. If yes, check all the components to see if there is oxidation.
9. Make sure that maintenance room is bright and has natural ventilation.
10. Ventilation: When do maintenance or soldering, some equipment can emit hazardous gas. So the maintenance room should have good natural ventilation. If there are no windows in maintenance room, the room should be equipped with electric air regenerating equipment.
11. There should be obvious antistatic labels in Electrostatic Sensitive area, such as in maintenance area and spare part warehouse.

## Chapter 3 M1721 Functional test and standards

### M1721 functional test item and standards

Test condition	Tested under photometric 800~2000Lux, using firmware supplied by Meizu as well as test software
Test Item	standards Reference basis
Button test	The power key, volume key, and primary key all work. The reaction is not dull and cannot be show Non corresponding key function
Sensor test	All the test item show green, it mean pass; if it show white , it mean skip this item; if it show red, it mean failed.
Charging test	battery state is charging, the external power and charging were green.
headset test	headset can be detect, headset button(volume button is work) , Headset sound clear, no noise. The headset sounds the same. The pause key is work
LCD test	no black block, , black dot, home button LED light uniform brightness
Gravity test	Turn the screen counter clockwise and display the arrow in four directions
Gyroscope Test	Rotate the phone in XYZ order, and the screen corresponds to the coordinate scale
Vibration test	Motors can vibrate, it cannot without vibration, it cannot have noise or vibration so week.
Sensor calibration	Flat cellphone , if the interface is show pass.it is normally ; if the cellphone is show red. We should click the accelerate calibration button
Front camera test	Preview clear, adjust the normal, clear photos
Back camera test	The preview is clear, the calibration is normal, the photos are clear and the focus is normal
Flash light test	White and yellow double color flash lamp is opened normally, brightness is even
Bluetooth test	You can find Bluetooth hotspots
WIFI test	WIFI hotspots can be searched, you must have more than one hot spot, the sensitivity value is greater than -60dBm, such as no strong signal, the interface does not display PASS
Light sensor test	When the light sensor is blocked, the screen backlight is turned off and the light sensor is switched on, and the screen backlight is turned on, and the brightness of the screen is changed evenly at 20%, 50%, and 80% backlight
Audio test	The sound of the ear, the receiver and the horn is normal, and there is no noise. The recording can be recorded and played, and the sound is normal
Screen lineation test	Touch sensitive, lineation normal, it cannot show serration line, broken line, multi-line when our touch to lineation
Multi touch test	Touch the line with at least three points
Finger print test	Use the fingerprint test APK, open the first two items of self-test display, through the finger defense Home key 3rd item display PASS, then release finger , until to all the test pass
Calling test	SIM card can be detected, the sound is clear in call, the signal is stable, Headset mode / Headset mode / speaker mode can be switching normally, the infrared can

be extinguished screen, it cannot have a single pass and noise, the infrared no effect

## Chapter 7 The common fault detect and maintenance

For dysfunctional machines, software problems should be ruled out first. Then step out troubleshooting hardware

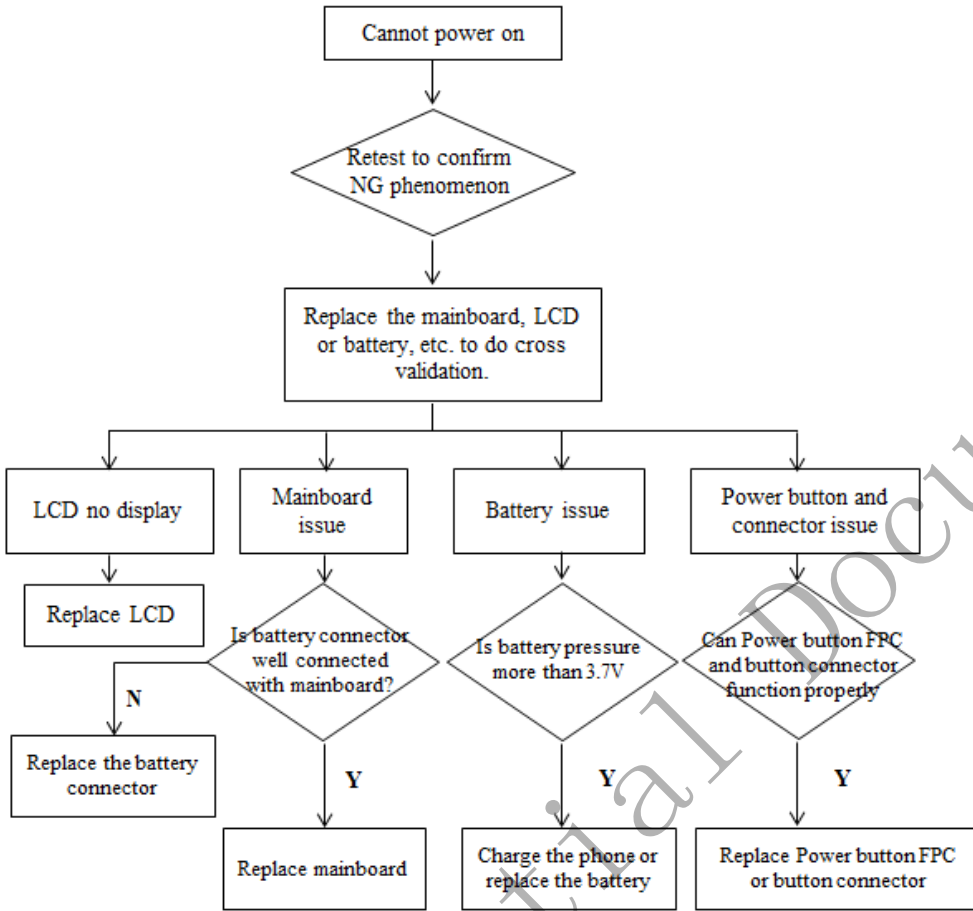

Software upgrade, please follow the following process

Firmware upgrade

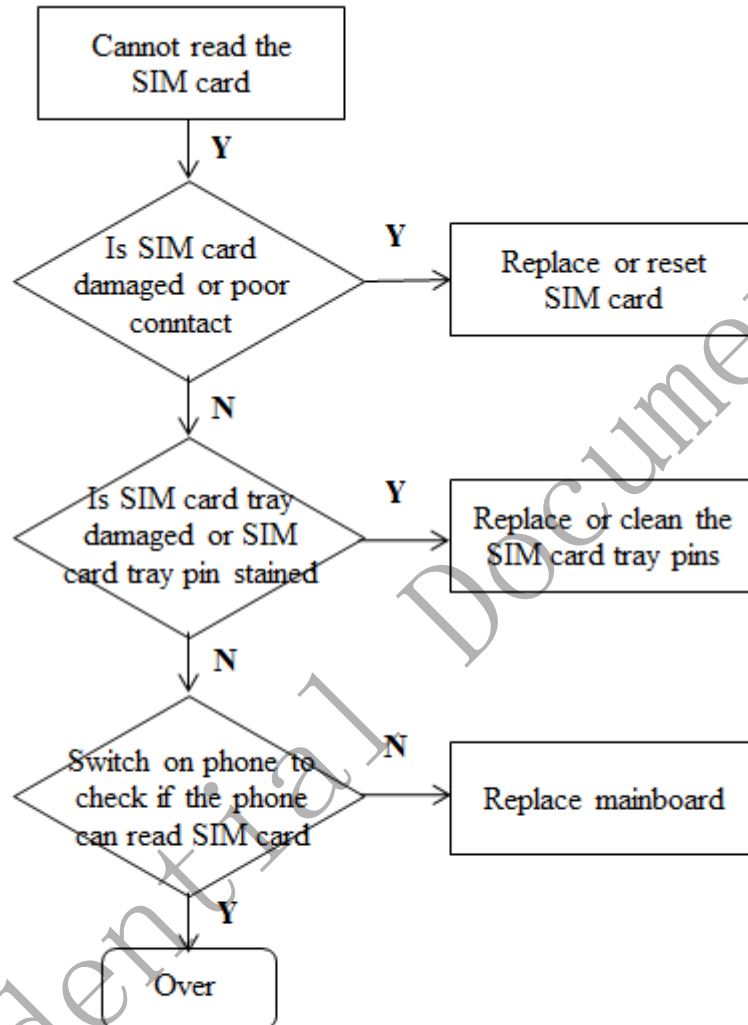

If the phone is flashed to Flyme firmware once again and the current problem still can't be solved, Please flash the phone to Engineer firmware (Refer to M1721 Upgrade Guide). Then use the test software carried by phone to do further tests to troubleshoot.

#### 1. No boot

2. SIM card no recognizable

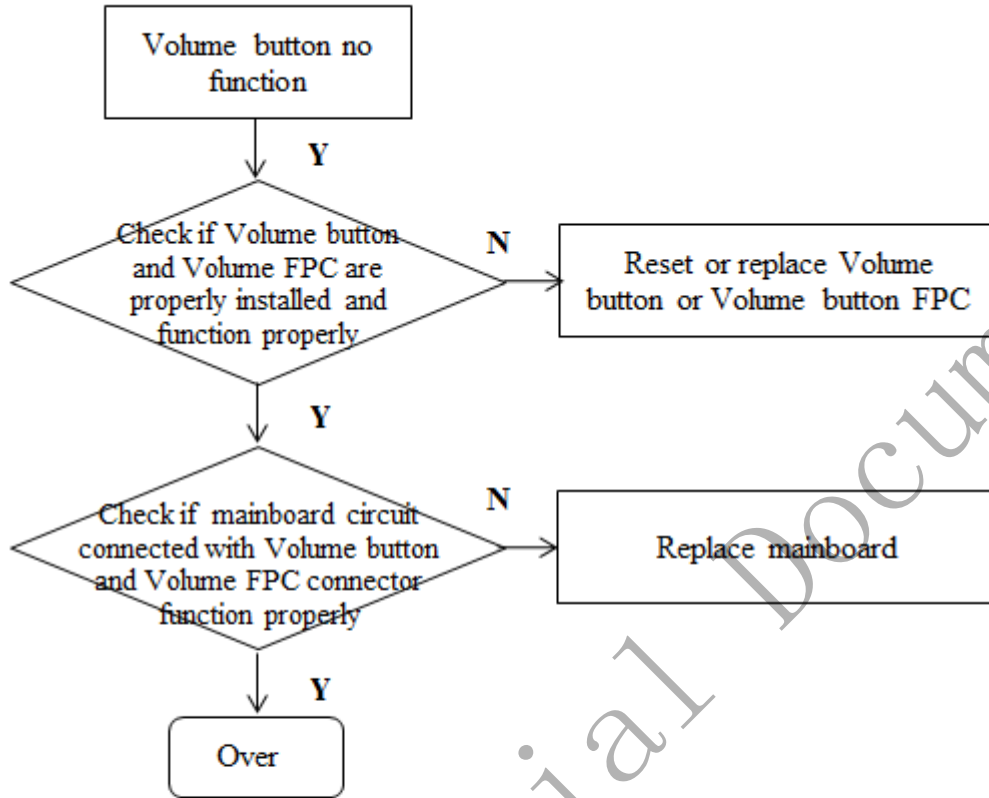

Note :

A.M1721 is Dual SIM card dual standby, include: mobile, Unicom, Telecom, Three CNC. Flash Flyme firmware.

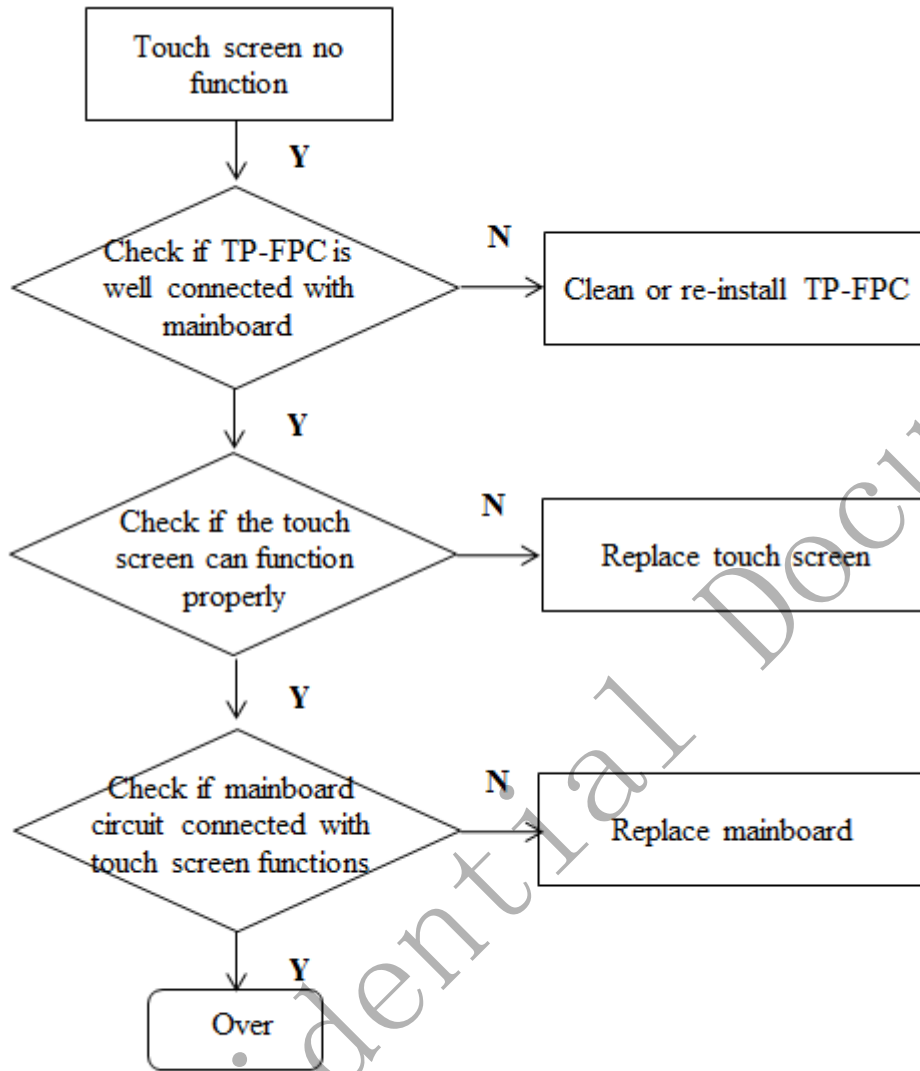

Please note that please make a distinguish

**B. Card 1** support SIM and SD card , **Card 2** hot-plugging.

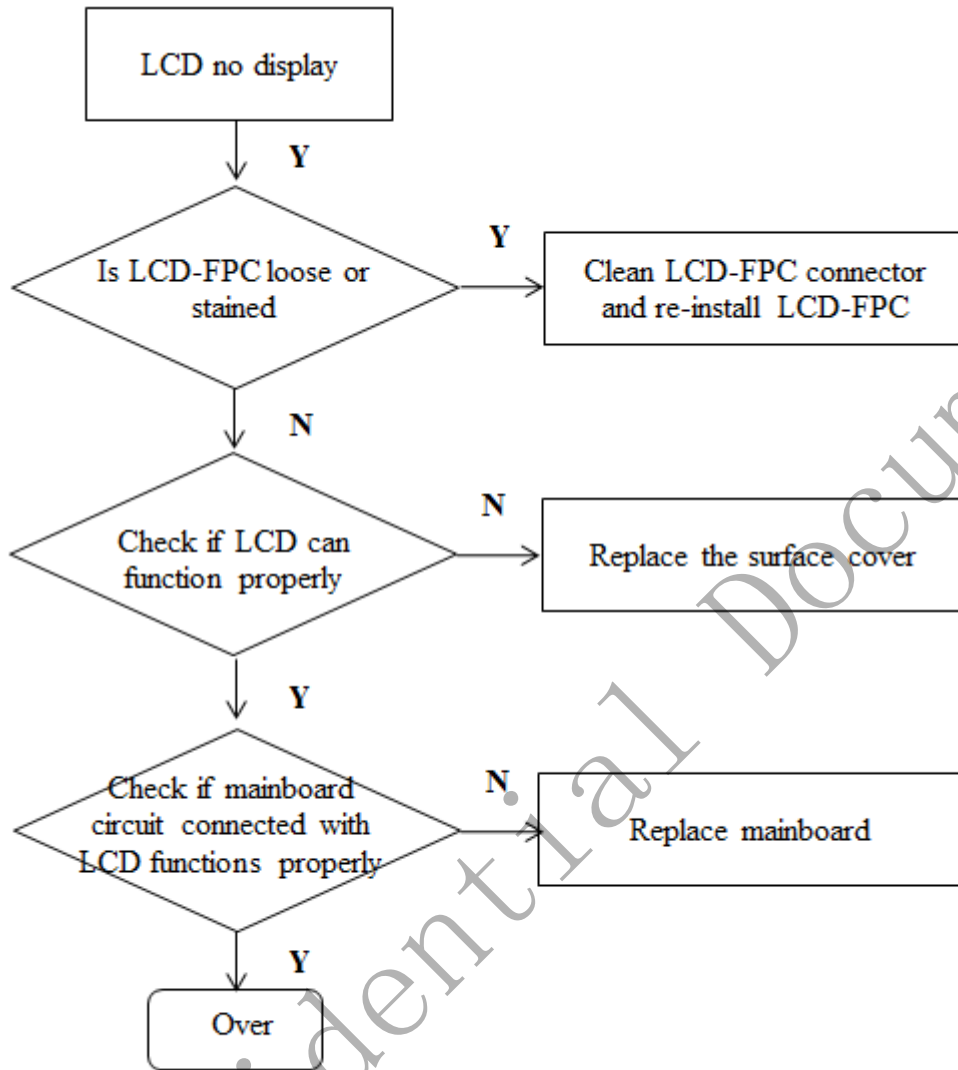

3.Volume button Fault

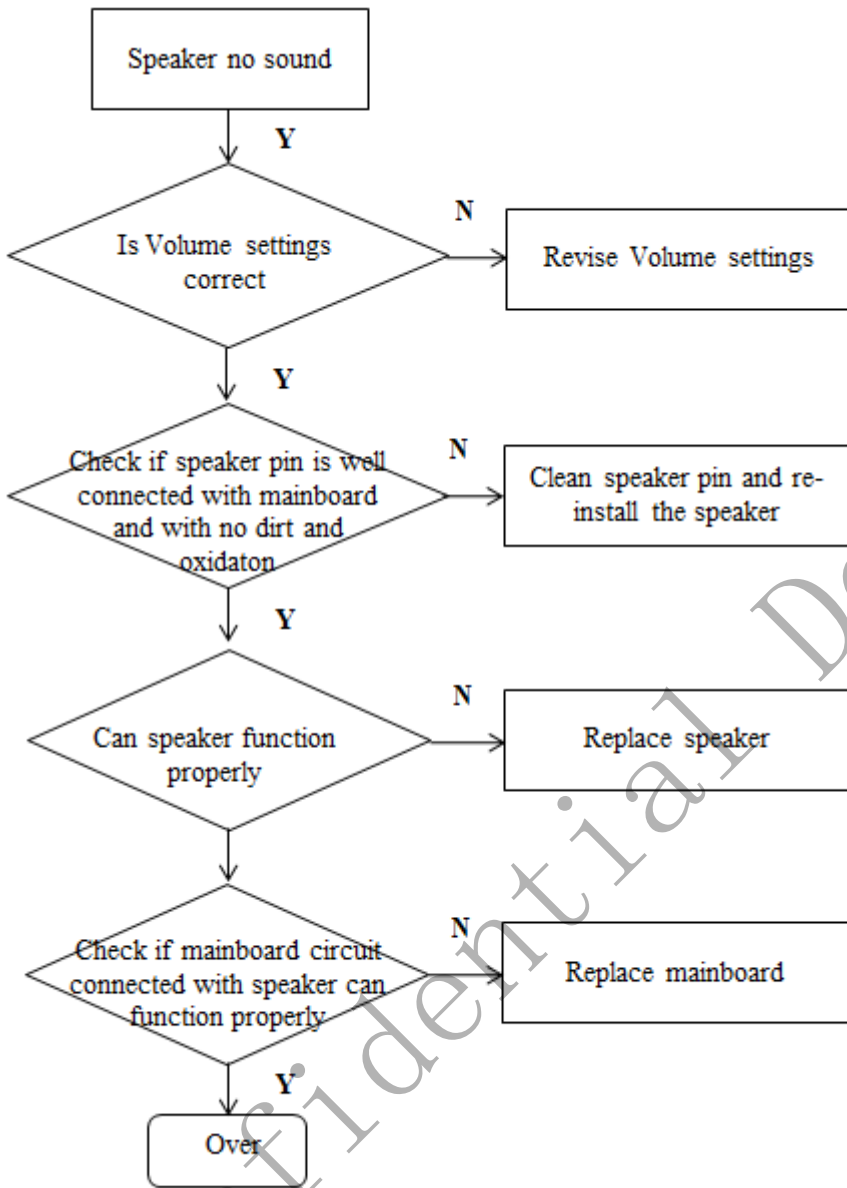

4.Touch Screen Fault

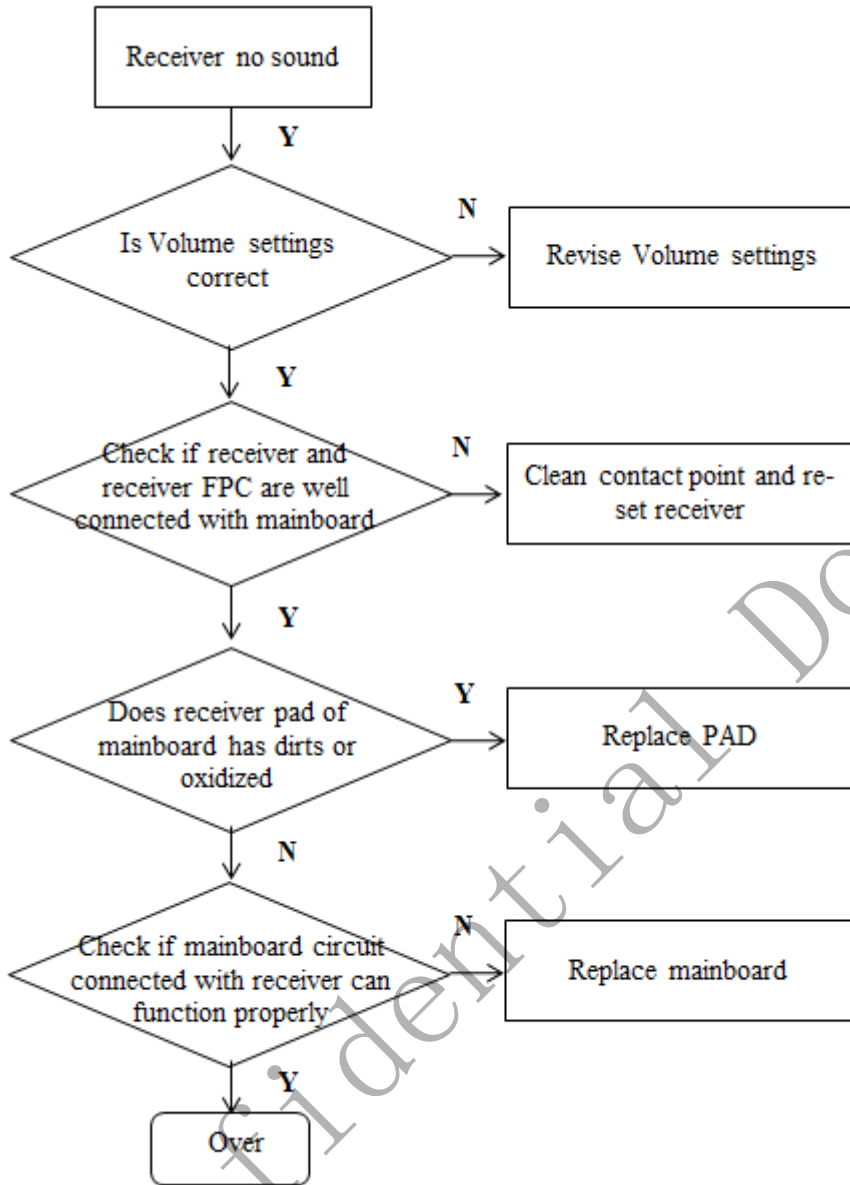

5.LCD display abnormal

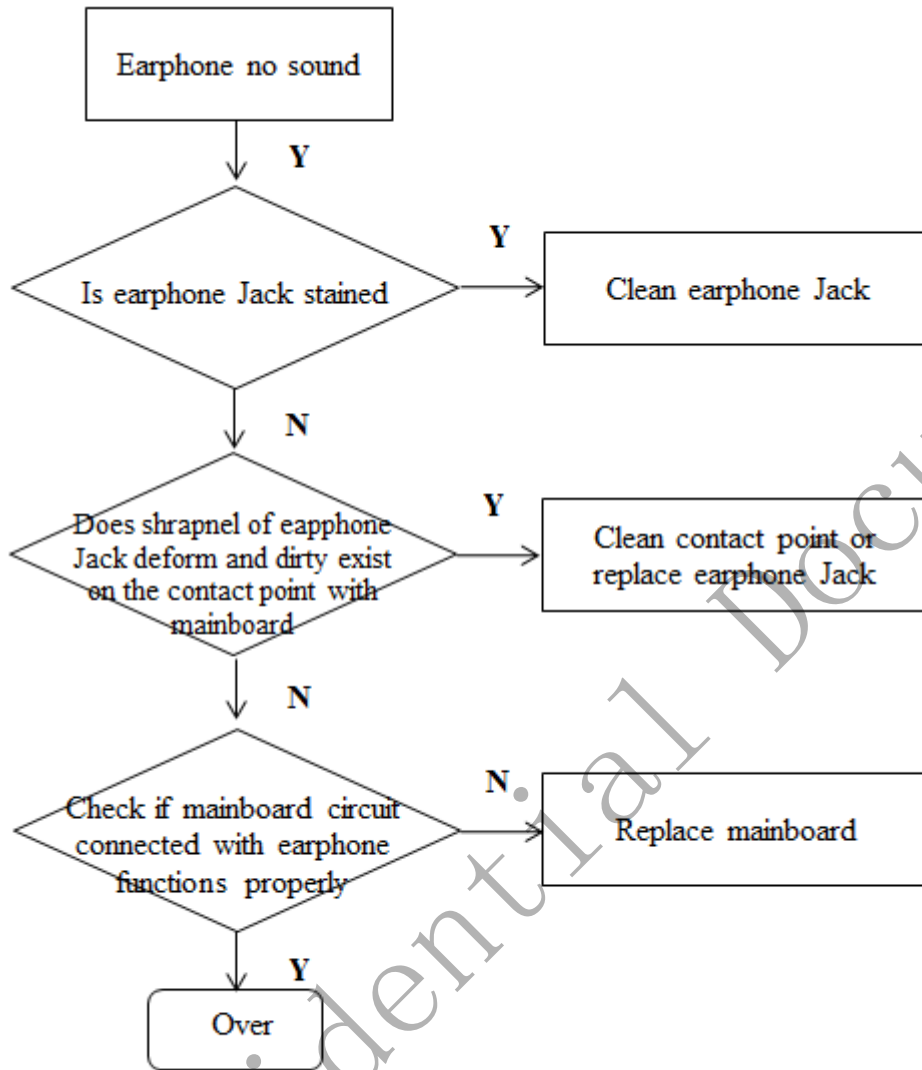

6. Speaker abnormal

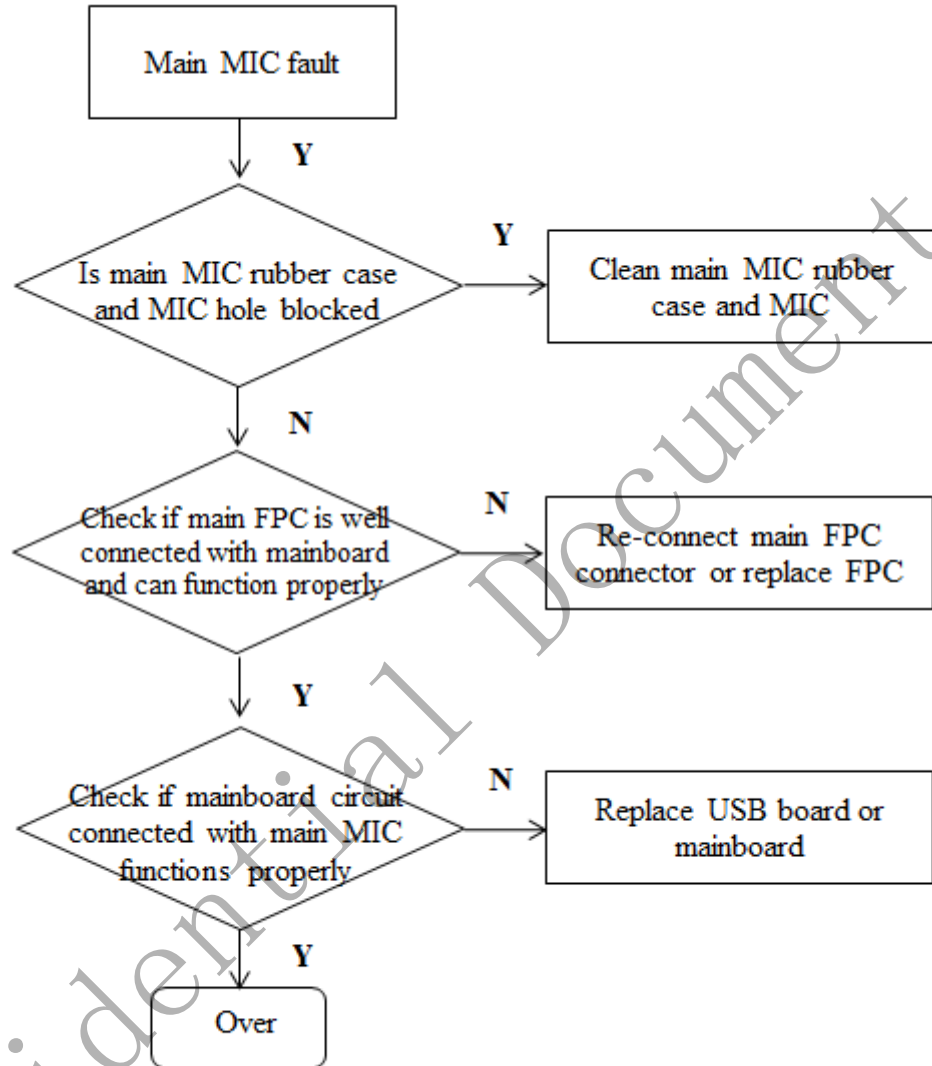

7.Headphone abnormal

8 Earphone abnormal

9. Main MIC abnormal

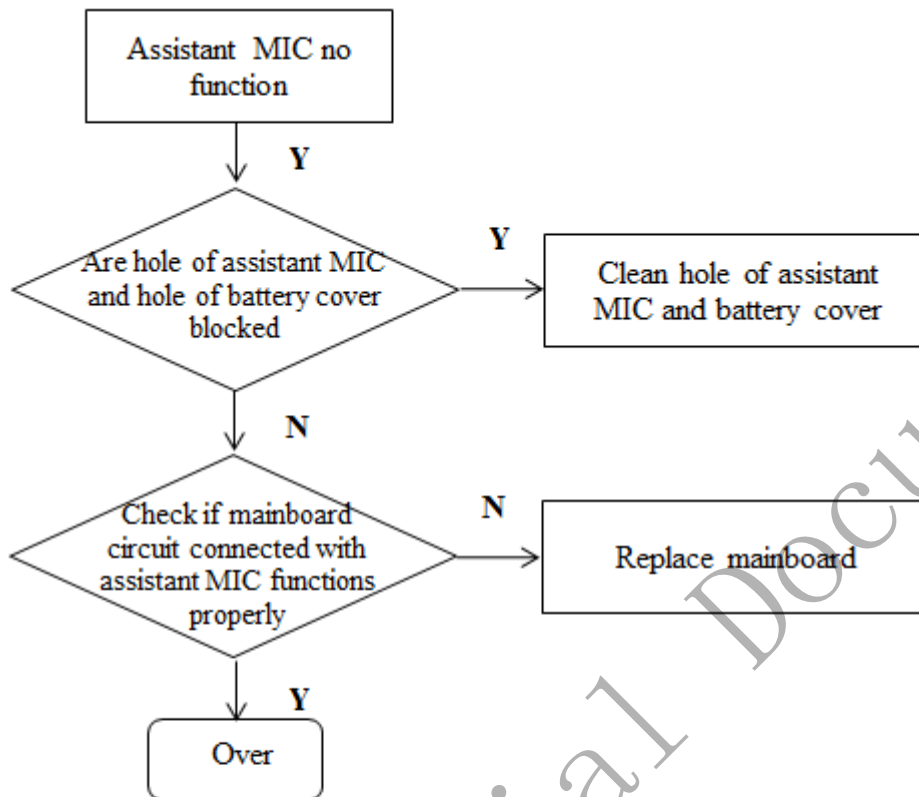

10. Vice MIC abnormal

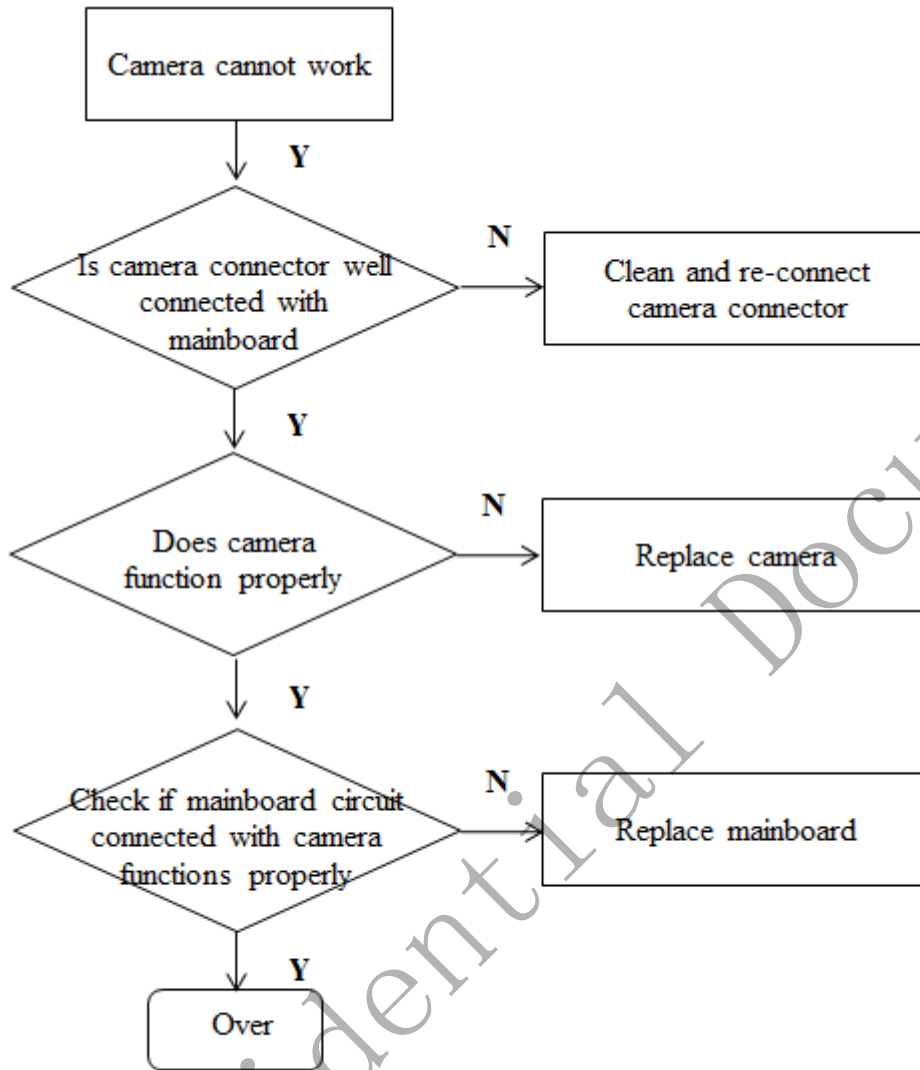

珠海市魅族科技有限公司  
MEIZU TECHNOLOGY CO., LTD.

广东省珠海市科技创新海岸魅族科技楼  
MEIZU Tech Bldg., Technology & Innovation Coast,  
Zhuhai 519085, Guangdong, China

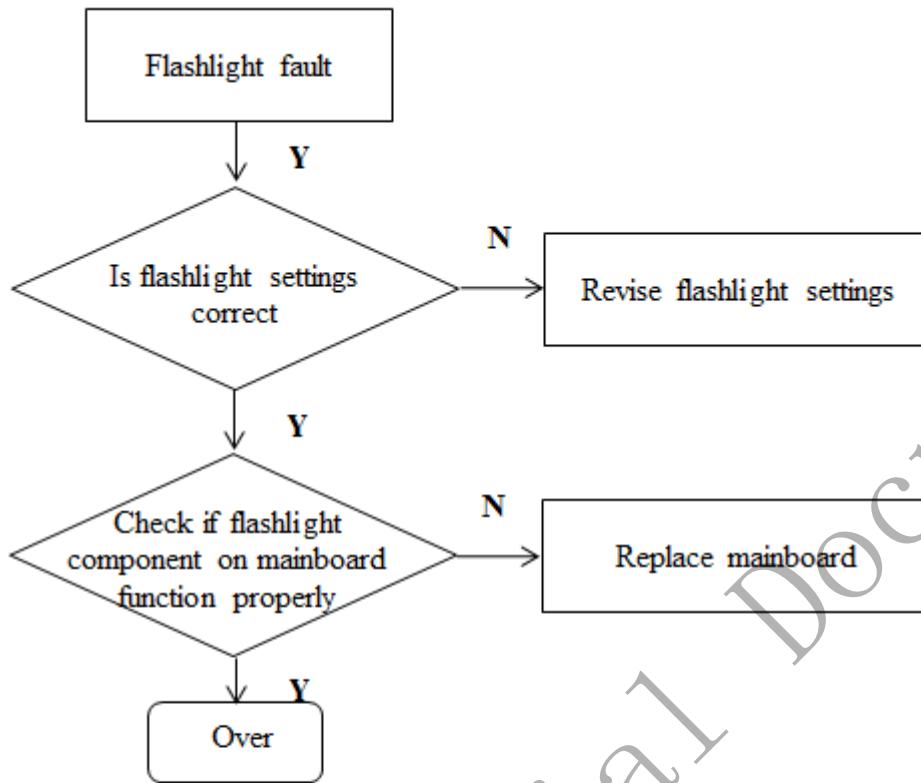

Tel /86-756-6116288  
Fax/86-756-6116200

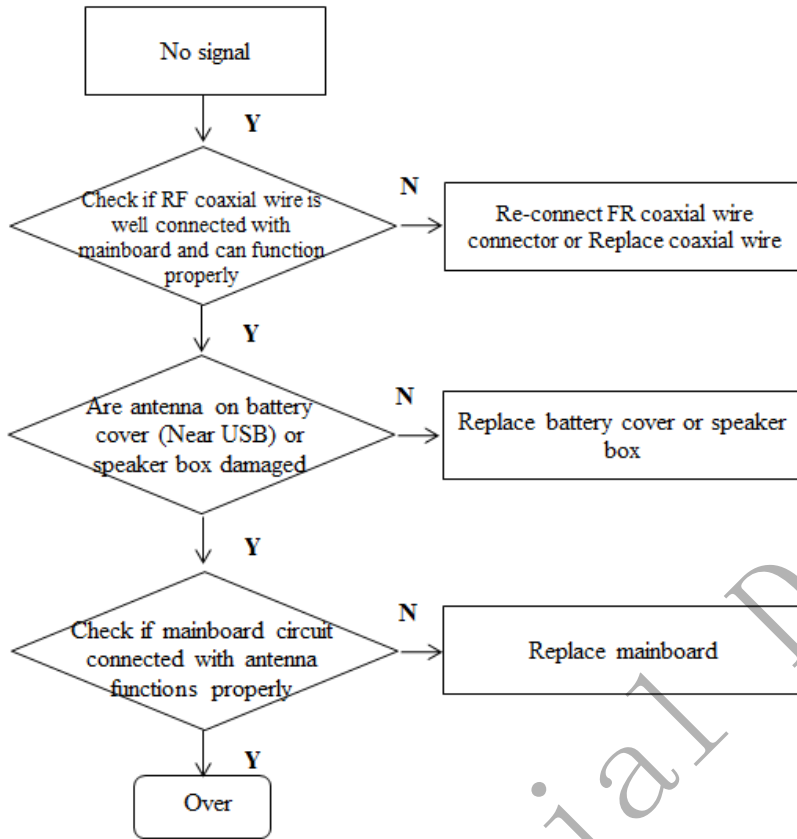

## 11. Main camera and front camera abnormal

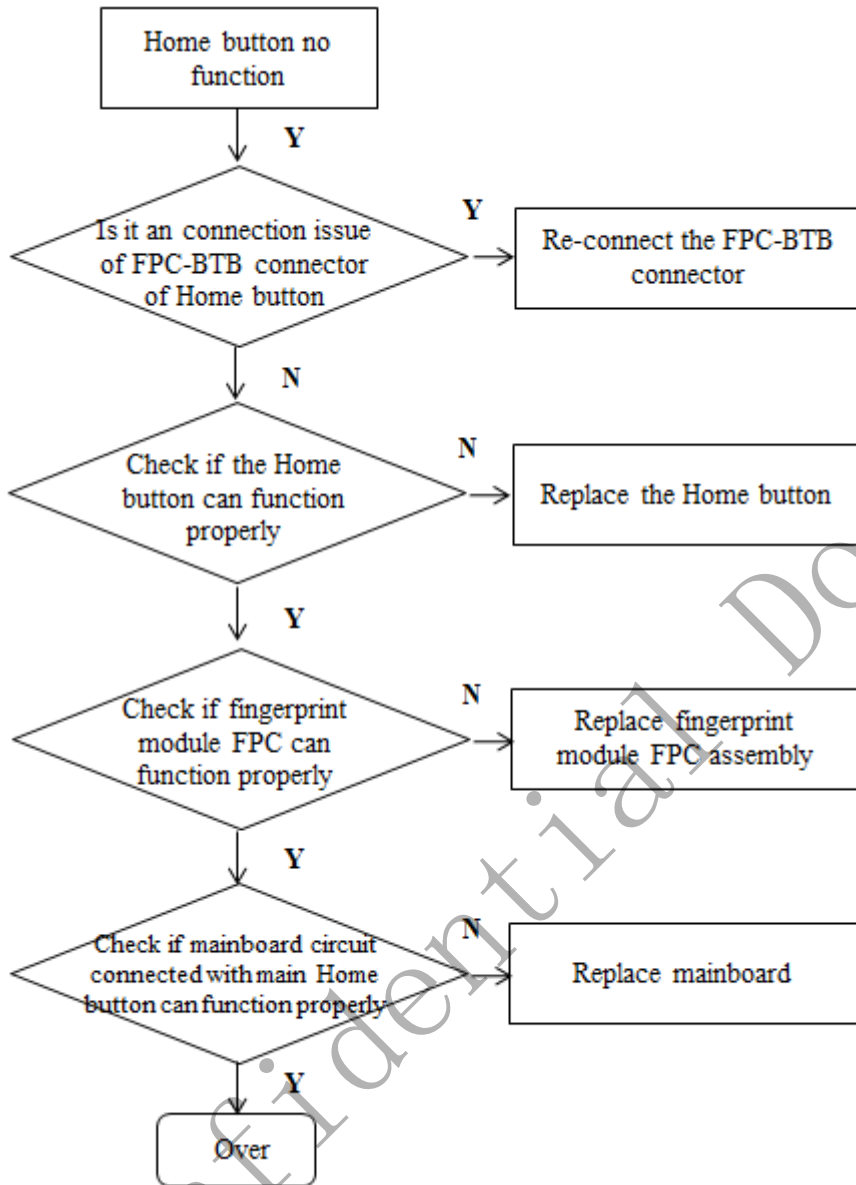

12. Flash light abnormal

13. Signal abnormal

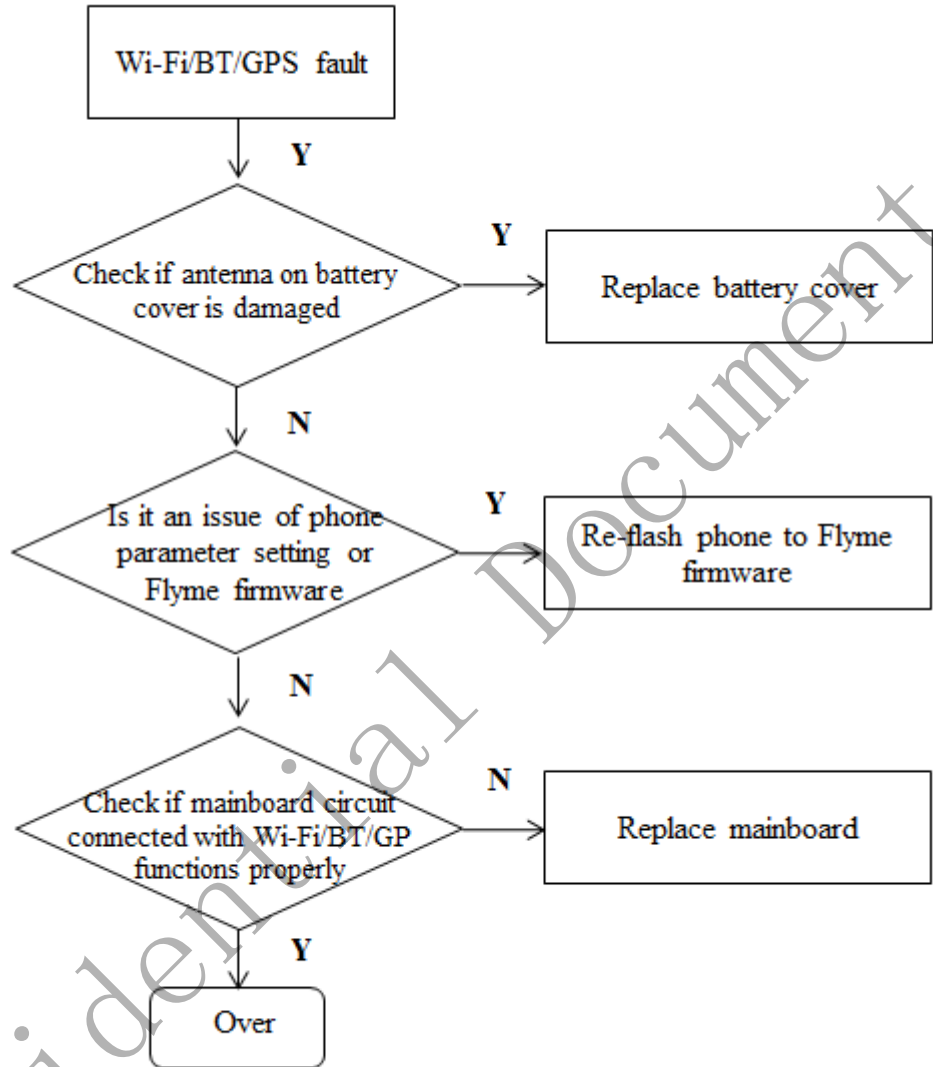

14. Home button abnormal

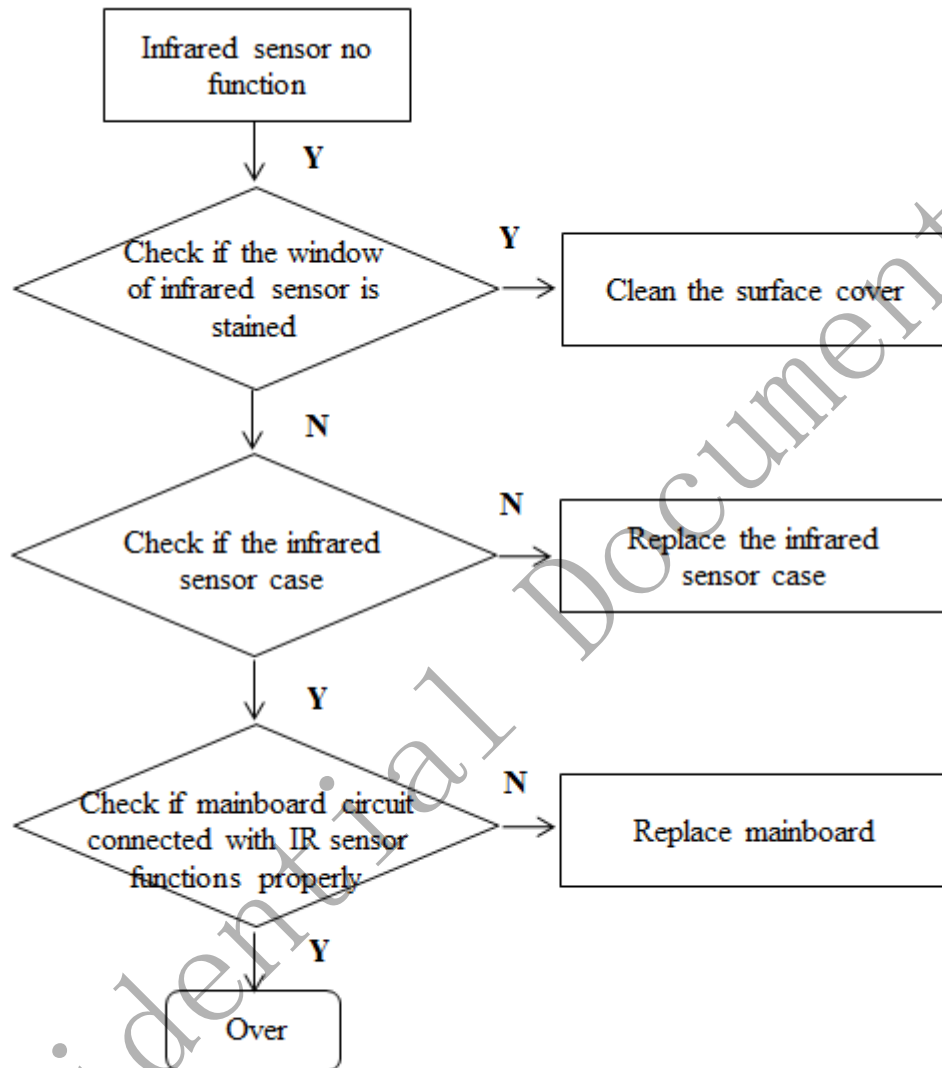

15. WIFI / Bluetooth/ GPS abnormal

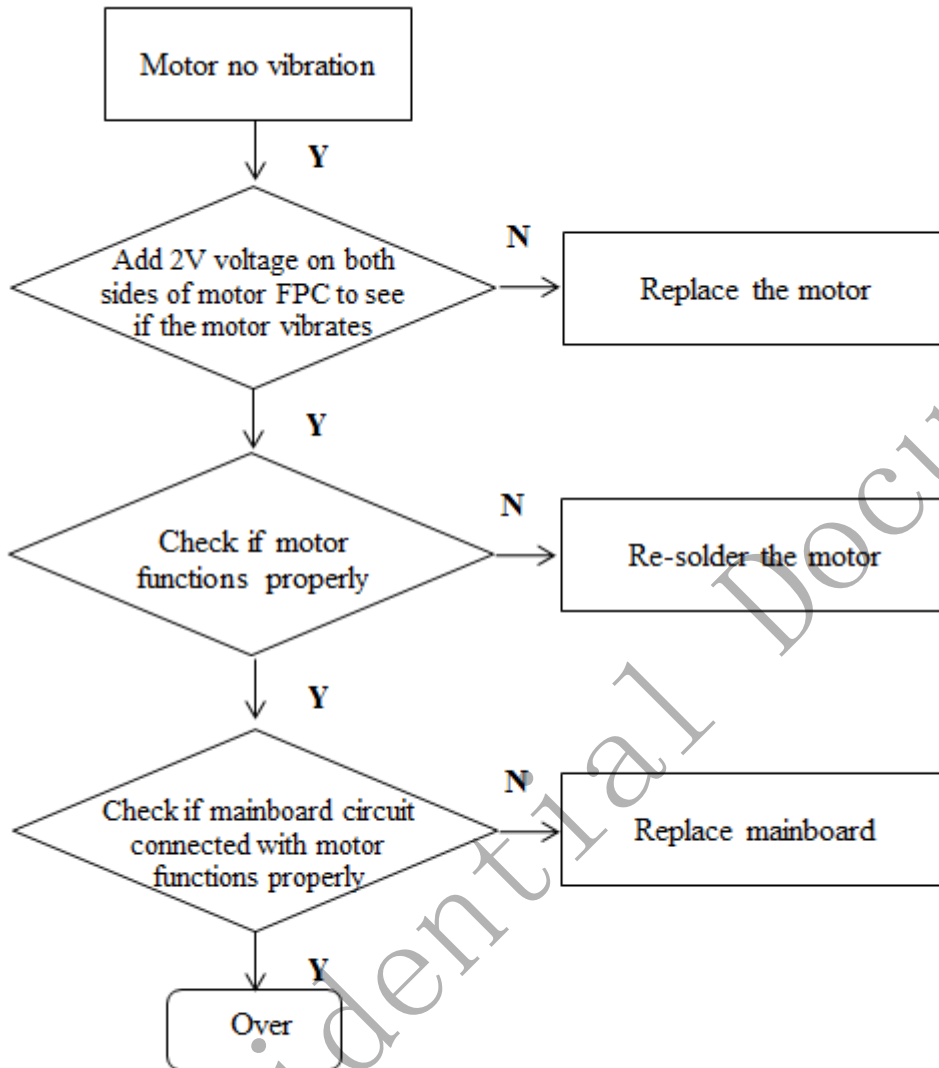

Antenna is used to emit and receive signal for Wi-Fi, Bluetooth or GPS , When Wi-Fi, Bluetooth or GPS fault happened, check if it' s an issue of mainboard or an issue of antenna on battery cover. Below is the process to deal with the problem:

16. Infrared sensor abnormal

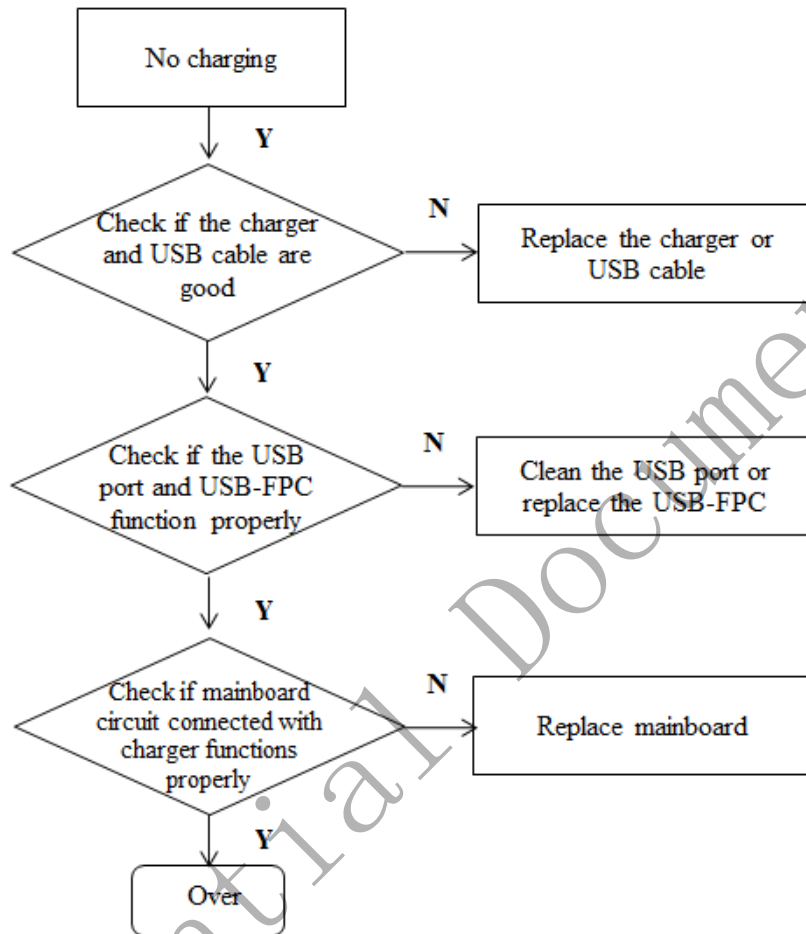

17.Motor abnormal

18. Charge abnormal

19. Note :

If you encounter one of the following problems, change the motherboard directly when the Flyme firmware is not work.

Fault item	Maintenance step 1	Maintenance step 2
Gyroscope	Re-flash Flyme	Replace Mainboard
Gravity induction	Re-flash Flyme	Replace Mainboard
Compass	Re-flash Flyme	Replace Mainboard

## M1721 Technical Parameters

MEIZU

Updated:2017/09/04

Capacity 16GB/32GB/64GB (Maximum support for 128GB memory cards)  
 Colors Obsidian Black Blue Peacock Silver moon Champagne gold  
 OS Flyme 6 (base on Android 7.1)

Basic Information	Height	154.6*75.2*7.3 mm
	Weight	173g
	Battery	4000mAh

Screen	Size	5.5-inch
	Resolution	1920 x 1080
	Contrast	1000: 1
	PPI	403
	Brightness	450cd/m <sup>2</sup> (typical value)
	Display technology	Super AMOLED
Manufacturing Process		GFF full lamination

Processor & Memory  
 Snapdragon 625 high performance processor  
 ARM® Cortex®-A53™ 2.0GHz x8  
 Qualcomm® Adreno™ 506 GPU  
 3GB/4GB LPDDR3 Memory

Camera	Rear	12 megapixels 6-element lens, 5 megapixels 5-element lens, Built-in Double ISP	f/1.9 aperture f/2.0 aperture 4- LED flash
	Front	16 megapixels ; ArcSoft® intelligent beautification algorithm Face AE	f/2.0 aperture ;

MTouch/mBack	Response speed	0.2s
	Recognition angle	360°
	Sensor	Capacitive touch sensor
	Memory	5 fingerprints

Port	Earphone port	top, 3.5mm port
	Data port	Micro USB 2.0 Type-C port
	OTG	Support
	SIM card	2 Nano SIM
	TF card	No Support
	Hi-Fi	Cirrus Logic CS43130

Sensor Gravity sensor, infrared proximity sensor, digital gyroscope, Touch sensor, digital compass, ambient light sensor

Positioning GPS A-GPS GLONASS Digital compass

Multimedia  
 Video: MP4、3GP、MOV、MKV、AVI、FLV、MPEG  
 Audio: FLAC、APE、AAC、MKA、OGG、MIDI、M4A、AMR  
 Image: JPEG、PNG、GIF、BMP

Operating Environment	Working environment temperature	-15 to 55°C
	Relative humidity	95%
	Operational altitude	Up to 5,000 meters
